CALENDAR, 1901-1902.

FAYETTEVILLE.

1901.

September 18, Wednesday—First term begins.

September 18-21—Entrance examinations.

November 26, Thursday—Thanksgiving, a holiday.

1902.

January 24, Friday—First term examinations begin.

February 1, Saturday—First term ends.

February 3, Monday—Second term begins.

May 22, Thursday—Decoration day, a holiday.

May 30, Friday—Decoration day, a holiday.

June 5, Thursday—Second term examinations begin.

June 15, Sunday—Baccalaureate sermon.

June 19, Thursday—Annual commencement.

MEDICAL DEPARTMENT, LITTLE ROCK.

1901.

October 10, Thursday—Regular session begins.

1902.

April 10, Thursday—Session ends.

LAW DEPARTMENT, LITTLE ROCK.

1901.

October 1, Tuesday—Fall term begins.

1902.

January 31, Friday—Fall term ends.

February 3, Monday—Spring term begins.

May 30, Friday—Spring term ends.

BRANCH NORMAL COLLEGE, PINE BLUFF.

1901.

September 3, Tuesday—Session begins.

1902.

May 30, Friday—Session ends.

BOARD OF TRUSTEES.

HIS EXCELLENCY, JEFFERSON DAVIS, Governor of Arkansas	Little Rock.
HON. H. N. PHARR, First District	La Grange.
HON. W. H. LANGFORD, Second District	Pine Bluff.
HON. C. C. HAMBY, Third District	Prescott.
HON. H. L. STROUP, Fourth District	Paris.
HON. J. C. MITCHELL, Fifth District	Fayetteville.
HON. V. Y. COOK, Sixth District	Elmo.

OFFICERS AND COMMITTEES OF THE BOARD.

EX OFFICIO PRESIDENT—Governor Jefferson Davis, Little Rock.

SECRETARY—Hugh F. Reagan, Fayetteville.

TREASURER—Jack Walker, Fayetteville.

EXECUTIVE COMMITTEE—Governor Davis, Chairman; Messrs. Langford, Mitchell, Stroup.

ON FINANCE—Messrs. Cook, Stroup, Pharr.

ON BRANCH NORMAL COLLEGE—Governor Davis, Messrs. Stroup, Langford.

ON AGRICULTURAL DEPARTMENT—Messrs. Pharr, Cook, Stroup.

ON MECHANICAL DEPARTMENT—Messrs. Hamby, Mitchell, Langford.

ON ARTS DEPARTMENT—Messrs. Langford, Mitchell, Cook.

ON PRINTING—Messrs. Hamby, Langford.

ON TEACHERS—Messrs. Pharr, Mitchell, Hamby, Langford.

BOARD OF CONTROL OF AGRICULTURAL EXPERIMENT STATION.

Committee on Agricultural Department, President of the University, Director of the Station.

FACULTY.

AT FAYETTEVILLE.

JOHN LEE BUCHANAN, A. M., LL. D.,
President,

ALBERT ERNEST MENKE, D. Sc., F. C. S., Ph. D.,
Professor of Chemistry and Physics.

JOHN CLINTON FUTRALI, M. A.
Professor of Ancient Languages.

GEORGE WESLEY DROKE, A. M.,
Professor of Mathematics and Astronomy.

JULIUS JAMES KNOCH, M. S., C. E.,
Professor of Civil Engineering.

WILLIAM NATHAN GLADSON, M. S., E. E., Ph. D.,
Professor of Electrical Engineering.

ALBERT HOMER PURDUE, A. B.,
Professor of Geology and Mineralogy and Curator of the
Museum.

CLIFFORD LEWIS NEWMAN, B. S.,
Superintendent of Agriculture.

SIMON JAMES McLEAN, M. A., LL. B., Ph. D.,
Professor of Economics and Sociology.

JUNIUS JORDAN, A. M., LL. D.,
Professor of Philosophy and Pedagogics.

CHARLES EDWIN HOUGHTON, A. B., M. M. E.,
Professor of Mechanical Engineering and Superintendent
of Mechanic Arts.

FRANK WELBORN PICKEL, A. B., M. Sc.,
Professor of Biology.

ALVIN FAYETTE LEWIS, A. M., Ph. D.,
Professor of History.

ERNEST WALKER, B. S. Agr.,
Professor of Horticulture.

WILLIAM ALEXANDER READ, Ph. D.,
Professor of English and Modern Languages.

EDGAR FINLEY SHANNON, B. A.,
Associate Professor of Ancient Languages.

BOLLING JAMES DUNN, A. M.,
Associate Professor of Mathematics.

PERCY HARGRAVES WALKER, M. S.,
Associate Professor of Chemistry and Physics.

COLBERT SEARLES, Ph. D.,
Associate Professor of English and Modern Languages.

*WILLIAM ALFRED CRAWFORD,
Principal of the Preparatory Department.

GEORGE ALBERT COLE, A. M.,
Acting Principal of the Preparatory Department.

GEORGE KARR SPENCER, Captain United States Army,
Professor of Military Science and Tactics, and Com-
mandant.

INSTRUCTORS AND OFFICERS.

HADGIE BOOKER DAVIES, A. B.,
Adjunct Professor of English and Modern Languages.

BURTON NEILL WILSON, B. Sc., M. E.,
Adjunct Professor of Mechanical Engineering and Assist-
ant Superintendent of Mechanic Arts.

WILLIAM ANDREW TREADWAY, B. E. E.,
Adjunct Professor of Electrical Engineering.

*MACK MARTIN, B. M. E.,
Assistant Superintendent of Mechanic Arts.

*CLARA EARLE, B. A.,
Instructor in English and Modern Languages.

NOTE.—Names, except that of the President, in the order of official seniority: (1) Professors, (2) Associate Professors, (3) other Instructors and Officers.

*Absent on leave.

ALLIE BUSH DEUPREE, M. A.,
Instructor in English and Modern Languages.

†E. L. BUSCH,
Musical Director.

†ELIZABETH BUSCH,
Piano.

ANNA HOOK EDMISTON,
Musical Director,

GERTRUDE CRAWFORD,
Instructor in Vocal Music.

*JENNY DELONEY RICE,
Director of the Art Department.

CHRISTINE SLOAN BREDIN,
Director of the Art Department.

.....
Instructor in Mathematics and Bookkeeping.

EMMA WILMER COLE, M. L. L.,
Instructor in History, Physiology and Latin.

MARY ANN DAVIS,
Instructor in English and History.

LINA REED, A. B.,
Instructor in English and Latin.

SUSIE HALL SPENCER, L. I.,
Instructor in Mathematics and Geography.

JENNIE WARD BOWMAN,
Instructor in Elocution and Physical Culture.

ROZE EMMALINE BENNETT, A. M.,
Instructor in Mathematics and History.

NAOMI JOSEPHINE WILLIAMS, A. M.,
Instructor in Latin and History.

JOBELLE HOLCOMB, A. B.,
Instructor in Latin and Mathematics.

†Resigned January 1, 1901.

*Absent on leave.

Holcombe

JAMES LINCOLN ROSS,

Instructor in Machine Shops and Forge.

VICTOR H. COCHRANE,

HAMPTON HUDGINS,

CARL L. SADLER,

} Class of 1901,

Assistant Instructors in Civil Engineering.

ADA PACE,

Librarian.

BURTON NEILL WILSON,

Superintendent of Grounds and Buildings.

JULIA WATKINS,

Superintendent of Dormitories.

JOHN GRISSOM,

Engineer.

AT LITTLE ROCK.

MEDICAL DEPARTMENT.

P. O. HOOPER, M. D.,

Emeritus Professor of the Practice of Medicine.

JAMES H. SOUTHALL, M. D.,

Emeritus Professor of the Practice of Medicine.

JAMES A. DIBRELL, M. D.,

Professor of General, Descriptive and Surgical Anatomy,
and President of the Faculty.

EDWIN BENTLEY, M. D.,

Professor of the Principles and Practice of Surgery.

C. W. WATKINS, M. D.,

Professor of the Practice of Medicine.

L. P. GIBSON, M. D.,

Demonstrator of Anatomy.

LOUIS R. STARK, M. D.,
Professor of Gynecology.

E. R. DIBRELL, M. D.,
Professor of Physiology, Physical Diagnosis, and Clinical
Medicine.

FRANK VINSONHALER, M. D.,
Professor of Ophthalmology and Otology.

T. N. ROBINSON, A. B., LL. B.,
Professor of Medical Chemistry and Toxicology.

W. H. MILLER, M. D.,
Professor of Obstetrics.

F. L. FRENCH, M. D.,
Professor of Materia Medica, Therapeutics, Hygiene and
Botany.

E. E. MOSS, A. M., LL. B.,
Professor of Legal Medicine.

CARLE E. BENTLEY, M. D.,
Professor of Clinical Surgery and Dermatology.

JAMES H. LENOW, M. D.,
Professor of Genito-Urinary Organs.

R. W. LINDSEY, M. D.,
W. P. ILLING, M. D.,
E. C. WITT, M. D.,
Special Clinical Lecturers.

ANDERSON WATKINS, M. D.,
Assistant Demonstrator of Anatomy.

WILLIAM A. SNODGRASS, M. D.,
Prosector of Anatomy.

F. L. FRENCH, M. D.,
Secretary of the Faculty, Little Rock, Ark.

LAW DEPARTMENT.

J. H. CARMICHAEL, LL. B.,
Dean.

T. N. ROBINSON, LL. B.,
Secretary.

(Complete list of Instructors and Lecturers on pages 137-138.)

AT PINE BLUFF.

BRANCH NORMAL COLLEGE.

NORMAL DEPARTMENT.

J. C. CORBIN, A. M., Ph. D.,
Principal.

JAMES C. SMITH, A. B.,
First Assistant.

THOMAS C. CHILDRESS, L. I.,
Second Assistant.

ANNA C. FREEMAN, L. I.,
Third Assistant.

LOUISA M. CORBIN,
Fourth Assistant.

MECHANICAL DEPARTMENT.

C. E. HOUGHTON, A. B., M. M. E.,
Superintendent.

W. S. HARRIS,
Assistant Superintendent.

E. K. BRALEY, B. M. E.,
Machine and Blacksmith Shops.

LORENZO ELLIS,
Engineer.

AT FAYETTEVILLE.

AGRICULTURAL EXPERIMENT STATION.

ROBERT LOVE BENNETT, M. S.,

Director.

ROBERT R. DINWIDDIE, M. D.,

Pathologist and Bacteriologist.

CLIFFORD LEWIS NEWMAN, B. S.,

Professor of Agriculture.

WILLIAM G. VINCENHELLER,

Pomologist.

ERNEST WALKER, B. S. Agr.,

Horticulturist and Entomologist.

JOHN FRANKLIN MOORE, B. S.,

Assistant Chemist.

GEORGE B. IRBY, B. A.,

Assistant Agriculturist at Newport.

STANDING COMMITTEES OF THE FACULTY.

The President of the University is ex-officio a member of all standing committees.

1. ON DISCIPLINE—Professors Lewis, Haughton, Pickel.
2. ON DOUBTFUL CASES—Professors Droke, Knoch, Cole.
3. ON CLASSIFICATIONS AND PETITIONS—Professors Purdue, Shannon.
4. ON ACCREDITED SCHOOLS—Professors Jordan, Menke, Dunn.
5. ON LIBRARY—Professors Read, McLean, P. H. Walker.
6. ON DORMITORIES—Professors Gladson, Newman, E. Walker.
7. ON ATHLETICS—Professors Futrall, Searles.
8. ON CHAPEL—The President and Commandant.

The University and the State.

The University is at the head of the public educational system of the State of Arkansas. It seeks to foster the higher educational interests of the State, broadly and generously interpreted, and to make provision for the demands of advanced scholarship in as many lines as its means will permit. It is the aim of its Faculty and Board of Trustees, from year to year, to bring it into still closer articulation with the public schools of the State, and in connection with them to afford to all the youth of either sex ample facilities for liberal education in literature, science and the industrial arts, and for the professional studies.

Through the aid received from the United States and from the State of Arkansas, the University is enabled to offer to its students free tuition, except in the studies of Law, Medicine and Music, and to open wide her doors to all seekers of learning.

The institution was established by virtue of an act of Congress donating public lands for educational purposes, and in accordance with an act of the General Assembly of the State of Arkansas.

LOCATION.

The University, except its Medical and Law Schools and Branch Normal College, is located at Fayetteville, Washington County, Ark. Situated in the heart of the Ozark Mountains, it is more than 1,500

feet above the sea level. The location is thought to be unsurpassed in salubrity of climate, in beauty of surrounding scenery, in variety and perfection of agricultural and horticultural productions, and in the morality and intelligence of its people.

Students may reach Fayetteville from both the north and the south by the Texas branch of the St. Louis and San Francisco Railroad, which has three trains daily each way, and various connections with other roads both north and south.

BUILDINGS.

UNIVERSITY HALL.

This is a brick structure with cut stone trimmings and a stone foundation. It is four stories in height above the basement. It consists of a front building 214 feet in length, and two wings, each 124 feet in depth, the whole forming three sides of a quadrangle. This building contains a large number of class rooms, Chapel, Library and Reading Room, separate Study Halls for the boys and girls of the Preparatory Department, Armory, Magazine, Band Room, Laboratories for Engineering, Biology and Geology, Music and Art Rooms, President's and Commandant's Offices, Natural History Museum, Examination Hall, Literary Society Halls, Toilet Rooms, etc., in all seventy rooms, together with broad corridors and stairways. The building is heated by steam, lighted by electricity, and supplied with water from the city waterworks.

SCIENCE HALL.

This building, designed especially for the departments of Chemistry and Physics, is a substantial two-story brick building, 50 by 90 feet. The basement is fitted up with suitable furnaces for assaying and metallurgical work. On the first floor are the lecture rooms of the two departments, the physical laboratory and storerooms, and also the private laboratory of the professor in charge. On the second floor are the chemical laboratories, including a laboratory for general chemistry, a laboratory for qualitative analysis, and a laboratory devoted to quantitative analysis; also a storeroom for chemical supplies, a weighing room, and a hallway. The building is supplied with gas, water, and steam heat, and with modern appliances for technical work. It will accommodate about 150 students.

BUCHANAN HALL.

This is a substantial and handsome brick building, three stories high, and containing over forty rooms. It is favorably located, with a view to the health of the occupants, and convenience of access to University Hall. The rooms are large, well ventilated and lighted, and open into broad corridors extending lengthwise through the building. From a wide veranda in front, there are three entrances to the building. There are also two rear entrances, and on the third floor a suite of rooms fitted up for an Infirmary. Through the generosity of the ladies of Fayetteville, this suite of rooms has been thoroughly equipped. By the aid

of the superintendent and the liberality of the students and citizens a handsome suite of parlors has been tastefully and elegantly furnished. In the rear of the Hall a brick building has been erected which furnishes bath and toilet rooms, supplied with cold and hot water.

AGRICULTURAL BUILDINGS.

The principal buildings of the Agricultural Experiment Station are of brick, one story in height. They contain several offices, the laboratories of the Station, the Station Museum, and several commodious storerooms. Belonging to the Department of Agriculture are a large barn, stock shed, dairy house, and other necessary outbuildings. During the past year a handsome cottage residence was erected for the manager of the University farm.

HORTICULTURAL BUILDING.

This structure is 60 by 23 feet, is heated by steam, and supplied with improved ventilating apparatus and other modern conveniences. Attached to this is a building 24 by 30 feet, which is designed to be used as a laboratory for plant study. The equipment thus provided furnishes much-needed facilities for study and research to all persons interested in plant life, and especially to students of horticulture.

The building is located north of University Hall, and, together with the improvement of the adjacent grounds, adds much to the sightliness of that part of the campus.

THE SHOPS.

The shop building is of brick with stone foundation and iron roof, and has a floor space of 8,000 square feet. It contains a wood room 80 by 40, a foundry 35 by 40, forge shops 32 by 40, a machine shop 40 by 48, and a boiler room 32 by 35. There is also a brick building 15 by 35, divided into two rooms, without communication, one of which is used for an office and the other for the storage of oil and paint; also a frame coal bin 12 by 30, covered with iron and accessible to teams from either side. These buildings are heated by steam and provided with water from the city waterworks and with fire hose. They will accommodate about 100 students in class work at one time. The legislature during the present session has made an appropriation for the erection of an important addition to the shop buildings.

THE LIBRARY.

The Library occupies the north wing of the main building, second floor. It now contains about 8,000 volumes, with numerous pamphlets, maps, charts, etc. Shelves are provided for 14,000 volumes, with room for expansion. There are also special libraries belonging to various departments comprising near 1,800 volumes.

The privileges of the Library, under proper regulations, are free to all students.

The Dewey decimal system of classification and the Cutter book-numbers are used, thereby simplify-

ing the circulation of books and the general care of the Library.

The leading high class periodicals (including magazines, reviews and various technical monthlies) are regularly taken, and are bound as they accumulate. This vast fund of current literature is rendered more useful and accessible by "Poole's Complete Index" to periodic literature from 1802 to the present time. A number of daily and weekly papers also come to the Library.

Among the works of general reference in the Library are all the best encyclopedias and dictionaries.

The card catalogue in preparation will greatly facilitate reference and will also greatly increase the usefulness and popularity of the Library.

THE ARMORY.

The Armory is a large, well lighted room, 60 by 80 feet, occupying the entire basement of the north wing of the main building. It is substantially fitted up with arm racks, compartments for equipments, and other conveniences. Two adjacent rooms are assigned to the Military Department, and are used as band-room and storeroom.

The equipment of the department consists of 300 Springfield Cadet Rifles, of the same model as those used at the United States Military Academy at West Point, 300 sets of infantry equipments, twenty-seven cadet swords (West Point pattern), National colors, flags, signal equipment, ammunition, etc., and a superior set of band instruments.

The arms and equipments are furnished the University by the general government. The other equipments have been purchased by the University and belong to the Military Department. The equipment is sufficient for a battalion of 400 cadets.

THE MUSEUM.

A. H. PURDUE, CURATOR.

The Museum occupies the fourth floor of the south wing of the main building. Large additions have recently been made to its equipment with a view to facilitate instruction in geology and biology and also to make it of increased interest to the visiting public. That portion of the collection suitable for display is arranged in glass cases, while the working collection is in drawers. Four new sloping-top cases with drawers beneath have recently been added, thus affording space for several thousand specimens.

Relief Maps. For illustration in geology and general interest to the public, there have been placed in the Museum the following relief maps: Geological relief maps of the State of Arkansas, Colorado Canon, Central Tennessee and the United States; a convex relief map of the United States on a section of a globe sixteen feet in diameter; a relief map of Carmel Bay, California; Ice Spring Craters, Utah; Yosemite Valley, Palestine, Mount Vesuvius, the State of California, and San Francisco Peninsula. Other maps are in preparation at the University.

The Mineral Collection. The mineral collection contains about 2,000 specimens, representing the different mineral groups. Many of these specimens are displayed in cases.

The Petrographic Collection. The most valuable part of this collection consists of the series furnished by the United States Geological Survey, representing sedimentary, igneous and metamorphic rocks. Besides this, there is a valuable collection of building and other stones from different parts of the country.

Paleontological Collection. There is a large collection of fossils in the Museum, but as they have not yet been arranged and catalogued, the number of specimens cannot be even estimated.

The Major Earle Collection. Major F. R. Earle has deposited in the Museum his private collection of minerals and fossils. This collection was formerly in Cane Hill College.

The Zoological and Botanical Collection. This collection consists of 200 birds and mammals, representing 80 species; 200 reptiles and amphibians, representing 40 species; 1,500 fishes, representing 350 species; 1,000 insects and other invertebrates, representing 200 species; several skeletons.

Donations to the Museum will be gratefully acknowledged, and the donors may be sure that anything of value sent to it will be carefully preserved and duly credited to the donor. Collections in the hands of private parties are likely to be soon scattered and destroyed through lack of care or improper handling.

The Museum is now prepared to receive collections on deposit, and to preserve and display them under the owner's name until called for.

While our Museum is most important on account of its educational value, it at the same time serves an important purpose in representing the resources of this State.

THE LABORATORIES.

In the laboratories of the University opportunities are afforded for practical instruction in Chemistry, Mineralogy, Physics, Botany, Zoology, Entomology, Horticulture, and in Civil, Mechanical, and Electrical Engineering.

CHEMICAL LABORATORIES.

The laboratories for chemical work are four in number and are situated in Science Hall. The Laboratory of General Chemistry is furnished with desks capable of accommodating eighty students. Each desk has a cupboard and two drawers, and is provided with gas and water. The Qualitative Laboratory has desks for sixteen students. Each desk is provided with suitable conveniences for taking care of apparatus, and is supplied with all the common reagents. The room is provided with a hood and other equipments usually found in qualitative laboratories. The Quantitative Laboratory has suitable accommodation for eight students, and beside the usual equipments, a Blake ore crusher and an assay furnace. Adjoining the Quantitative Labora-

tory is the weighing room, which contains two of Becker's best analytical balances, besides a number of less accurate instruments suitable for weighing large quantities of chemicals. The storeroom contains all the apparatus and chemicals. The room is in charge of an assistant, who gives out the supplies and keeps the books. This room contains the apparatus for preparing distilled water, and has also some space for laboratory work.

The Physical Laboratory is a room 20 by 70 feet and is provided with large tables suitable for use in performing experiments in General Physics and physical measurements. It has also eight pillars built up from the ground, and independent of the rest of the building, for the accommodation of delicate instruments which would otherwise be disturbed by the vibrations of the floor. The storeroom of physical apparatus is supplied with instruments suitable for illustrating the principles of Physics and for the use of students in practical work.

BIOLOGICAL LABORATORY.

The Biological Laboratory is located on the third floor of the University building, and has accommodation for about forty students. The Laboratory is furnished with work tables, a sink, and the necessary gas fixtures for incubators, sterilizers, etc., also an aquarium for keeping aquatic animals and plants on hand for observation and study. The equipment in apparatus consists of Bausch and Lomb compound micro-

scopes, dissecting microscopes, microtomes, and such other apparatus and chemicals as are needed for practical work in biology. There is a collection of insects and also apparatus for collecting, drying, preserving and mounting insects. The Laboratory has a number of skeletons of different animals, and models and charts for teaching plant and animal anatomy.

GEOLOGICAL LABORATORY.

The Geological Laboratory is provided with aneroid barometers, compasses, hand-levels, pedometers, etc., for field work, two petrographic microscopes, and an excellent equipment of drawing apparatus for the construction of geological sections and topographic maps; also, with apparatus for the construction of relief maps.

There is a well-equipped laboratory for Determinative Mineralogy, and a room for the preparation of relief maps and other work connected with the department of geology.

MECHANICAL ENGINEERING LABORATORY.

The three boilers used to heat the buildings and run the shops furnish ample facilities for testing the evaporative power of boilers, and the fuel consumption per pound of water evaporated. Comparative tests of feed-pumps and injectors are made. There is a complete set of calorimeters, thermometers, engine counters, engine indicators, measuring tanks, injectors, feed-water heaters, and all necessary apparatus for making

engine and boiler tests. A Westinghouse, a Reynolds-Corliss, an ordinary slide valve, a horizontal and a vertical engine furnish all necessary apparatus for practice in valve setting and examples of steam engines.

An 8 by 10 automatic slide-valve engine, now under construction in the shops, will soon be added to the equipment of the department.

A 60,000-pound Riehle testing machine is used to give the student practice in testing the strength of materials of construction.

ELECTRICAL LABORATORY.

The Electrical Laboratory affords excellent facilities for experimental work with practical dynamo-electric machines. In the laboratory will be found the leading types of machines for arc and incandescence lighting, and for power; constant current and constant potential motors and generators, representative of the different methods of power transmission; a Kelvin balance, standard cells, and a potentiometer for standardizing measuring instruments; Weston and other voltmeters and ammeters; electro-dynamometers; galvanometers of the tangent, reflecting, and Deprez d'Arsonval types; magnetometers; standard resistance coils and bridges, and absorption dynamometers.

During the past year there have been added two Kelvin voltmeters, a D. C. A. C. polyphase motor-generator, a standard photometer, and a large number of smaller pieces of apparatus.

This equipment, to which valuable additions are

made from time to time, enables the student to carry on experimental work of a very wide range, and to attain proficiency in operating and testing electrical machinery and instruments.

Students are also allowed to inspect the plant of the Fayetteville Electric Light and Power Company, and to take measurements and make tests on it. The Electrical Laboratory is connected with their primary mains, and is thus supplied with alternate currents at 2,000 volts potential for experimental work.

CIVIL ENGINEERING LABORATORY AND EQUIPMENT.

The Civil Engineering Laboratory is provided with all necessary instruments for work in land, rail-road and city surveying. The equipment of field instruments has been selected so as to afford students the opportunity of becoming familiar with the instruments of different manufacturers. Among the usual field instruments there are a number of engineers' transits, theodolite, Y levels, transit with solar attachment, compasses, hand levels, standard and ordinary steel tapes, aneroid barometers, plane table, sextant, etc.

During the past year the laboratory has been entirely remodeled, now occupying two large, well lighted rooms in the basement of the main building. An equipment for work in practical astronomy has also been added, consisting of a large Altazimuth, reading to seconds by levels and micrometers; a sidereal clock with break circuit attachment and a chronograph reading to tenths of seconds.

CEMENT LABORATORY.

The equipment for the purpose of testing the strength of mortars and cement, includes one 2,000-pound tensile testing machine, standard consistency apparatus, Vicat's and Gilmore's needles for determining set, metal molds for tension, compression and transverse test-pieces, steaming apparatus for blowing tests, and sieves for fineness.

SHOP EQUIPMENT.

The machine shop contains a Westinghouse engine, which runs the machinery in the whole building, a large iron planer, a shaper, four lathes of different sizes and makes, drill press, two grinding machines, milling machine, 60,000-pound testing machine, and a good supply of hand tools, benches and materials.

The forge shop contains twelve Buffalo forges with down draft which takes the smoke away through underground pipes, thus avoiding the smoke and dirt of the ordinary blacksmith shop. It also contains a shearing and a punching machine, twelve anvils of different weights, and all the necessary blacksmith tools for the twelve forges.

The wood shop contains one buzz planer, one large cylinder planer, circular saw, band saw, double spindle shaper, mortising and boring machine, five smaller lathes, one 18-inch pattern maker's lathe, and eighteen benches, each equipped with a complete set of carpenter's tools.

The foundry contains one Colliau cupola with a capacity of one and one-half tons of iron per hour, one brass furnace of 150 pounds capacity, a Buffalo pressure blower, and a core oven.

The foundry is well equipped with moulder's tools, flasks, etc.

The boiler room contains two 75-horsepower boilers, one 40-horsepower boiler, feed pump, injectors, feed-water heater, measuring tanks, etc.

The various departments of the shop building afford facilities for giving practical instruction to sixty or seventy students at one time.

Among the facilities for instruction in engineering contained in the equipment of the University in addition to the shop equipment may be mentioned:

A Dean steam pump with air chamber, water and steam cylinders, and valve chambers sectioned, so that a student may see the working parts.

A Cameron steam pump with a steam cylinder sectioned, showing the valve motion.

A Knowles pump in full working order.

A Blake steam pump in section.

Sections of injectors.

A model of a Stevenson's link motion.

A collection of samples of manufactured articles, such as steam pipe coverings, leather beltings, lubricating oils, etc.

DRAWING ROOM.

The equipment includes the usual tables and stools; and among the special apparatus and instru-

ments may be mentioned the planimeter, odontograph, slide rule, set of railroad curves, etc. A blue-print room has recently been fitted up with complete facilities for the details of the blue-print process. The room is also provided with photographic facilities which will be used to prepare lantern slides and prints illustrating various branches of engineering.

ART ROOM.

A commodious art room has been provided, and furnished with such appliances as are needed for efficient work in that department.

PHYSICAL CULTURE ROOM.

At the opening of the past year a large room on the north wing of the main building was set apart for the use of the Department of Physical Culture. This room has been furnished as far as means were available with the equipment necessary for systematic physical training.

CONDITIONS OF ADMISSION.

Candidates for admission are urged to be present at the beginning of the session. Admission at a later date is not refused, but is attended with greater or less inconvenience.

Students on their arrival in Fayetteville should report promptly to the President. Needless delay in reporting or unseemly conduct may justify exclusion from the University.

Applicants should present certificates of honorable discharge from the school last attended, or furnish other testimonials of good moral character.

Examinations for admission to the Freshman class will be held in the following subjects:

1. *English.* The admission requirements in English are those of the American Association of Colleges, and most of the leading institutions in the United States. The examination is divided into two parts.

(a) *Reading and Practice.* A few books are assigned for reading. The candidate is required to present evidence of a general knowledge of the subject-matter of these books, and to answer simple questions on the lives of their authors. The form of the examination will usually be the writing of a paragraph or two on each of the several topics set in the examination paper. The treatment of these topics is designed to test the candidate's power of clear and accurate expression, and calls for only a general knowledge of the substance of the books. In place of a part or the whole of this test, the candidate may present an exercise book, properly certified by his instructor, containing compositions or other written work done in connection with the reading of these books.

The books set for this part of the examination are:

1901-1902—Goldsmith's *Vicar of Wakefield*; Cooper's *Last of the Mohicans*; Lowell's *Vision of Sir Launfal*; Shakespeare's *Merchant of Venice*; Pope's *Iliad*, Books I, VI, XXII and XXIV; the *Sir Roger*

de Coverly Papers in the Spectator; Scott's *Ivanhoe*; Coleridge's *Ancient Mariner*; Tennyson's *Princess*; George Eliot's *Silas Warner*.

(*b*) *Study and Practice.* Other books are assigned for more careful study. The examination upon these books covers subject-matter, form, and structure, and also tests the candidate's ability to express his knowledge with clearness and accuracy.

The books set for this part of the examination are:

1901-1902—Burke's *Speech on Conciliation with America*; Macaulay's *Essays on Milton and Addison*; Shakespeare's *Macbeth**; Milton's *L'Allegro, Il Penseroso, Comus and Lycidas*.

In order to pass this examination, a student must have a good practical knowledge of English Grammar (as much as is contained in Maxwell's *English Grammar*), and of an elementary Rhetoric such as Raub's, Waddy's or Williams's; and no candidate will be accepted whose work is noticeably defective in point of spelling, punctuation, idiom, or division into paragraphs.

2. *Arithmetic.* The examination will include the whole of some standard arithmetic.

3. *Algebra.* To Simultaneous Quadratic Equations, with special attention to factoring, the theory of exponents, and radicals. The examination will be taken from Wentworth's *Higher Algebra*.

4. *Plane Geometry.* All of Plane Geometry will be required for admission to the Freshman class.

*Julius Cæsar will be accepted.

5. *History.* The examination will be taken from Shinn's History of the United States and Barnes's General History.

6. *Geography.* Any complete manual, such as Maury's or Frye's, will give the preparation, if thoroughly mastered. Special attention is given to the geography of the United States and of Arkansas.

7. *Physiology.* Martin's Human Body, briefer course.

8. *Latin.* Collar and Daniel's Beginner's Latin Book; the first twenty-five lessons in Bennett's Latin Composition; Caesar's Gallic War, four books, with questions on grammar and on the subject-matter, military equipment, etc. Lowe and Ewing's Caesar is recommended. Latin is required for admission in Bachelor of Arts, Bachelor of Philosophy, and Normal courses; not in the other courses.

Students are advised to come prepared for all the studies in some one class, otherwise their course is necessarily more or less irregular.

ORDER OF EXAMINATIONS FOR ADMISSION.

Wednesday, September 18.—9 a. m., registration of students; 1 to 3 p. m., Geometry; 3 to 4 p. m., Physiology.

Thursday, September 19.—1 to 3 p. m., Arithmetic; 3 to 4 p. m., Geography.

Friday, September 20.—9 to 12 m., Algebra; 1 to 4 p. m., Latin.

Saturday, September 21.—9 to 11 a. m., English Grammar and Analysis; 11 to 12 m., English Composi-

tion, Reading; 1 to 2:30 p. m., U. S. History; 2:30 to 4 p. m., General History.

EXAMINATIONS AT OTHER PLACES THAN FAYETTEVILLE.

Students living at a distance from the University may obtain special local examinations if applied for in due time before the beginning of each session. The questions will be sent on application to the principal of any school or to any county examiner. The questions must be submitted by the principal or county examiner to the candidate under the usual restrictions of a written examination, and the questions and answers must be returned by the same officer to the University with his indorsement that the examination was properly conducted.

ADMISSION ON CERTIFICATES.

The graduates of accredited schools are admitted to the Freshman class in the University without examination, provided in all cases, certificates from the principal of the school attended be presented, containing specific statements of the kind and extent of work done in the studies in which credits are desired. Blank forms for such certificates will be furnished by the University. Students from schools regularly accredited to other universities will be admitted to the Freshman class without examination, provided they present evidence that such schools are duly accredited and that they have completed the work required for admission to the Freshman class of this University in the courses which they desire to take.

A student who presents a certificate of scholarship from a high school, academy, or college not on the list of accredited schools, is required to take such examinations as may be prescribed. The result of such examinations, together with the certificates, will be passed on and proper credit allowed by the professors of the departments which such student proposes to enter.

ADMISSION TO ADVANCED STANDING.

Candidates for admission to classes in advance of the Freshman will be required to pass satisfactory examinations in the subject previously pursued by the class which they propose to enter. But such candidates coming from colleges or universities of good standing may on the presentation of proper certificates as to the studies pursued be admitted provisionally to such standing and upon such terms as the Faculty may deem equitable in each case.

ACCREDITED SCHOOLS.

On application from the principal of any high school, academy, or other institution, an officer of the University will visit and examine the organization and work of such school. The points to be observed are the subjects included in the course of study, the extent of instruction in each subject, the text books used, the length of the session, length of the recitation hours, methods of teaching, facilities for instruction, and the discipline. Upon a favorable report, submitted in writing by the visiting officer, the school is declared by

vote of the Faculty duly accredited to the Freshman class of the University.

Any changes that may occur, especially in the principalship of the school, or in its course of study, should be reported to the President of the University, as the list of accredited schools is subject to yearly revision.

The University earnestly desires to cultivate friendly and harmonious relations with all other educational enterprises of the State, and to add to its list all schools that are doing the required work and that desire to assume the accredited relation.

LIST OF ACCREDITED SCHOOLS.

- Harrison High School, Principal, J. H. Caldwell.
Bellefonte High School, Principal, J. C. Eaton.
Fort Smith High School, Principal, B. W. Torreyson.
Little Rock High School, Principal, R. C. Hall.
Marianna Institute, Principal, S. E. L. Brown.
Lonoke High School, Principal, W. N. Hamlin.
Pine Bluff High School, Principal, J. H. Witherspoon.
Paris High School, Paris, Tex., Principal, J. G. Wooten.
Helena High School, Principal, W. W. Rivers.
Hot Springs High School, Principal, George B. Cook.
Amity High School, Principal, S. M. Samson.
Paris Academy, Paris, Ark., Principal, W. M. Wear.
Dardanelle High School, Principal, J. C. Bunch.
Eureka Springs High School, Principal, C. S. Barnett, Eureka Springs, Ark.
Southwestern Academy, Magnolia, Ark., Principal, J. W. Cantwell.
Texarkana High School, Principal, Andrew Rose.
Hope High School, Principal, P. T. Walker.
Thompson's Classical Institute, Paragould, Ark., Principal, R. S. Thompson.
Jonesboro Training School, Principal, F. R. Alexander.

Fordyce Training School, Principal, J. D. Clary. Fordyce, Ark.

Camden High School, Principal, H. H. Harper, Camden, Ark.

Spears Langford Military Academy, Principals, G. S. Storey and R. B. Willis, Searcy, Ark.

Van Buren High School, Principal, A. L. Peacher, Van Buren, Ark.

Green Forest Academy, Principal, H. P. Burney.

Arkansas Cumberland College, Principal, J. T. Perigo.

Springdale High School, Principal, W. D. Gray.

GENERAL INFORMATION.

SELECTION OF COURSES OF STUDY.

Students are allowed all reasonable freedom in choosing their courses of study. But they are required to pursue their studies in the order prescribed, and, when candidates for a degree, to complete, as a condition of graduation, all the subjects in the course leading to such degree. Changes in the courses of study selected are discouraged, but for sufficient reasons are allowed if made within three weeks after admission; subsequently no such change can be made during the session except by the express permission of the Faculty.

NUMBER OF RECITATIONS.

Not less than twelve nor more than eighteen recitations or their equivalent per week, exclusive of military science and tactics, are allowed, except by permission of the Faculty. Two hours of laboratory, shop or

farm work, drawing or sight-reading, are counted equivalent to one recitation. If less than twelve recitations or their equivalent per week are specified in any course, studies must be elected to make up the deficiency.

CLASSIFICATION OF STUDENTS.

The satisfactory completion of the work of a class as attested by daily recitations and examinations is the condition of enrollment in a higher class. Some margin, however, is allowed for making up studies in arrears. But more than six hours per week required for such studies or more than six hours per week omitted from the studies of a given class prevents enrollment therein, except that in the engineering courses the number in both cases may be as many as eight. No student can be classified as Freshman in any course who has more than six hours per week of unfinished preparatory work.

SPECIAL STUDENTS.

1. Students are advised to pursue in all cases in which it is practicable some one of the regular courses leading to a degree. The number of these courses with the liberal provision for electives allows sufficient play for individual preference in the selection of subjects required for a liberal and well rounded education.

2. But students who are not candidates for a degree, but who have completed all the studies below the Freshman class, may elect a special course of study

under the supervision of the Classification Committee and with the approval of the professors in charge of the subjects chosen.

3. Persons of mature age (not less than 21 years of age) may elect a special course of study under the direction of the Faculty, provided they show by examination or otherwise that they are qualified to pursue profitably the studies which they propose to take up.

4. Students in special courses are subject to the same regulations and to the same examinations in the studies pursued as all other undergraduate students.

EXAMINATIONS.

1. Examinations, chiefly in writing, are held near the end of each term. The grades are determined by combining the values of the daily recitations and of the examinations, and are divided into five groups, as follows: "Excellent" (E); "Good" (G); "Fair" (F); "Poor" (P); "Bad" (B). A grade not lower than "Fair" is required for a "pass," which is the equivalent of about 75 per cent. At the end of each term a report is made to the parent or guardian of each student showing his progress, general conduct, etc.

2. If a student has failed in any study, he may nevertheless be allowed to take up the next study in advance, provided he be deemed, by the professor in charge of the department to which such study belongs, not incompetent to pursue it; but he will be required to pass a satisfactory examination in the study in which he failed, or take it up with the next class.

3. If a student has proved competent to continue his advanced work, but has not completed all the preceding studies in his course, he must resume the latter, and if he be found to be overworked, he will be required to drop a part of his advanced work.

APPOINTMENT OF BENEFICIARIES.

An act of the General Assembly of the State of Arkansas "To Regulate the Appointment of Beneficiary Students in the University of Arkansas, and to amend section 4088 of the Digest of the Statutes of 1894," approved April 19, 1895, reads as follows:

"*Section 4088.* It shall be the duty of the Board of Trustees to apportion the number of beneficiaries who shall be admitted as students in the University, without tuition, among the several counties of the State, according to population, and to notify the county judge of each county of the number apportioned to the county at least two months prior to the beginning of each regular annual session of the school; and it shall be the duty of the county judge to appoint from the actual residents of the county the number of beneficiaries to which it may be entitled, a preference being given to those noted for diligence and proficiency in study; and the appointment so made shall be entered of record. If the judge of any county shall fail to appoint its quota of beneficiaries, or if those appointed shall fail to attend, the President of the University shall appoint such beneficiaries to the full number authorized by law from other

counties having their full quota; *provided*, such appointments shall be vacated on application of the county judge of a county so failing to fill its quota."

NUMBER OF BENEFICIARIES.

The number of beneficiaries fixed by the Board of Trustees is 1,000, distributed to the counties of the State in proportion to the population.

There is also one "Honorable Scholarship" to each county, to be awarded for superior merit and proficiency, from the public schools of each county, according to section 2, of act of July 23, 1868.

All the beneficiary students should be present if practicable at the opening of the first term.

Appointments of beneficiaries are made for a period of four years; but failure to enter the University within a reasonable time, or absence from the University for a year or more, forfeits the appointment. Withdrawal at any time during the session may be construed to forfeit an appointment. A student may be reappointed after an appointment has expired or been forfeited.

QUALIFICATIONS.

County judges, in appointing beneficiaries, are requested to note that applicants will be required to pass satisfactory examinations in the following subjects as a condition of admission to the lowest preparatory class:

1. The Grammar School Arithmetic,

2. Maxwell's Elementary Grammar and Composition.

3. The whole of some Complete Manual of Geography.

4. Proficiency in spelling, reading and writing.

It is *highly important* in making appointments to *note carefully these requirements: otherwise students coming to the University unprepared incur needless expense and go away disappointed and often discouraged.*

FORM OF APPOINTMENT.

Students who have been appointed beneficiaries must bring evidence of appointment in the following form, to be sent by the judge of the county court, in accordance with the sixth section of an act approved March 6, 1875.

(FORM I—APPOINTMENT.)

No.... [To be given to the student.]

To Whom It May Concern:

I hereby appoint....., ofCounty, State of Arkansas, as a beneficiary to the University of Arkansas.

Given under my hand this....day of....., 190....

Send a notice like the following to the President of the University, and one to the Secretary of the Board of Trustees, at Fayetteville:

(FORM II—NOTICE TO THE PRESIDENT OF THE UNIVERSITY.)

.....Arkansas,
.....

To theUniversity:

I hereby notify you that I have this day appointed of County, State of Arkansas, a beneficiary of the University of Arkansas.

Given under my hand this....day of....., 190....

FEES AND EXPENSES.

Beneficiary students pay no tuition except in Art and Music. (For terms in Art and Music, see Departments of Art and Music.)

Admission fee, per session, charged all beneficiary students	\$5.00
Tuition per year to non beneficiary students	\$30.00
Furniture for dormitory students, from	\$6.00 to \$15.00
Board in dormitory at cost, per month, from	\$8.00 to \$15.00
Board in private families, per month, from	\$10.00 to \$15.00
Uniform, including cap, purchased by male students, from	\$13.00 to \$15.00
Washing, per month, from	\$1.00 to \$1.50

The necessary expenses of a student who wishes to live cheaply are:

Board in dormitory, 9 months, about	\$80.00
Washing, 9 months, about	\$9.00
Furniture, first year only	\$6.00 to \$15.00
Admission fee	\$5.00
Total expenses first year, including uniform, but not other clothes or books, about ...	\$109.00
Total expenses, after first year, about	\$94.00

Admission fees are payable in advance; tuition fees are payable one half at the beginning of each term. Board bills are payable monthly in advance.

A diploma fee of \$5 is charged all graduates. All dues are to be paid or satisfactorily adjusted before diplomas are conferred.

BOARD FOR YOUNG MEN.

Rooms in the University dormitories are free, but occupants provide their furniture, fuel, and lights.

Students leaving the University frequently sell their furniture at a small reduction. If there are not rooms enough for all, preference is given to Arkansas students. An officer of the University is in charge of the building, and the rooms are inspected by the Faculty whenever deemed necessary.

Students boarding elsewhere are under the supervision of the President of the University, and are allowed to board only at places approved by him. No student is allowed to change his boarding place without the consent of the President.

BOARD FOR YOUNG LADIES.

Sufficient funds have not yet been secured to provide a dormitory for young ladies, but all necessary assistance is rendered them in finding homes in private families in the town. Parents, therefore, who send a daughter to the University, should place her under the control of the family with whom she boards, subject to the general supervision of the President of the University.

ABSENCES AND WITHDRAWALS.

Absences from the University during the session are not permitted except for valid reasons. The right of a parent to withdraw his son at any time, without reason assigned, is recognized, but without so withdrawing him, he cannot relieve him of the obligation to attend to his duties at the University. The incidental absences of students during the session are exceedingly

disadvantageous, both to themselves and to the University. While, therefore, the Faculty permit them, in cases where propriety or urgent necessity seems to make them unavoidable, they hold it to be a duty to inquire into the reasons for which the permission is solicited.

Parents or guardians who wish to withdraw their children or wards from the University should write to the President stating their wishes. No honorable discharge will be given to a student under age who is unable to produce the written application of his parent or guardian for his withdrawal, nor will an honorable discharge be given to a student under censure of any kind, whether for neglect of duty or other cause, even though he may have the consent of his parent or guardian for his withdrawal from the University.

SALE OF ARDENT SPIRITS PROHIBITED.

By an act of the General Assembly of the State of Arkansas, approved March 6, 1875, it is unlawful for any person to sell or give away any vinous or ardent spirits within three miles of the University of Arkansas, unless it be prescribed by a regular practicing physician for medicinal purposes.

UNIVERSITY ORGANIZATIONS.

LITERARY SOCIETIES.

Material changes have recently been made in the organization of the literary societies, and a new one, the Periclean, has been added. Their meetings, which are held weekly, afford enlarged opportunities for improvement in declamation, composition, debate, etc. Renewed interest in this valuable means of culture is shown by a number of students.

THE WILLIAM JENNINGS BRYAN PRIZE.

A prize fund of \$250 has been bestowed upon the University through the liberality of Hon. W. J. Bryan, of Nebraska, and a prize, named in his honor and consisting of the annual income of this fund will be offered each year, provided productions worthy of its bestowal be presented.

The prize will be awarded for the best essay on some topic relating to the problems of government, and the subjects for competition will be selected on alternate years by the Department of Economics and Sociology and the Department of History. The contest will be open to students who have Junior or Senior standing, more than half of whose work has been of the grade G, and to special students in the collegiate department who have thirty-two hours credit of a similar grade.

The subject for the year 1901-1902 will be The Development of the Principle of Ministerial Responsibility and its Adaptability to American Institutions. Further details of the plan of competition may be obtained from the Professor of History. The competitive essays must be submitted by the first of May, 1902.

PRIZE IN THE MATHETIAN SOCIETY.

Professor G. W. Droke, of the class of 1880, generously offers a prize to be competed for by the members of that society. This prize is awarded for the best declamation.

PRIZE IN THE GARLAND SOCIETY.

Through the liberality of Professor G. A. Cole there is offered a handsome prize to be competed for by the members of the Garland Society. This prize is for the greatest improvement in debate.

THE ARKANSAS UNIVERSITY GEOLOGICAL AND BIOLOGICAL SURVEY.

For the promotion of interest in the natural sciences and a systematic investigation of the many interesting questions of natural history within and adjoining the State, it is proposed to organize the Arkansas University Geological and Biological Survey. A party will be organized for field work during the summer vacation under the direction of the professors in charge of Geology and Biology. Any student whose attainments are such as to permit him to take the work to advantage may be admitted to the party. In each case

credit will be given in the University course according to the time spent and the character of the work done. Science teachers and others interested in science throughout the State are cordially invited to avail themselves of this opportunity of doing a pleasant and profitable summer's work.

UNIVERSITY MAGAZINE.

The "Ozark" is a monthly periodical, edited and published by the students of the University. It is sent free to all the accredited schools, and to such other schools in the State as may desire it.

RELIGIOUS EXERCISES.

Religious exercises are held regularly in the University Chapel at a given period during each daily session. Students are required to attend.

The churches of Fayetteville cordially welcome the students to their Sunday Schools and various meetings for prayer and religious instruction. The denominations represented in the city are Baptist, Presbyterian, Cumberland Presbyterian, Methodist Episcopal, Methodist Episcopal South, Protestant Episcopal, Christian, and Roman Catholic. Many of the students are actively engaged in the work of the different church societies and guilds. The Young Men's Christian Association holds regular meetings, and a commendable interest is shown in the work of the Association. Two Bible classes have been organized and weekly recitations are conducted by officers of the University.

ATHLETIC ASSOCIATION.

The purpose of this organization is to encourage the development of the physical man.

The Association as originally formed consisted of the U. of A. Athletic Club, the U. of A. Tennis Club, the U. of A. Baseball Club, and the U. of A. Football Club; and it is further provided that if any other club, organized by the students of the University for the practice of any sport, game, or exercise not already represented by one of the members of the Association, shall make a written application for membership in the Association, and the said application shall be approved by the governing body of the Association, the petitioning club shall become a member of the Association with all the rights and privileges pertaining to such membership.

MILITARY DEPARTMENT.

The head of this department is usually an officer of the United States Army detailed by the War Department for duty at the University.

All male collegiate students are required to take the Theoretical Course, and all male students over 15 years of age, not physically disabled, are required to take the Practical Course in Military Science, the latter including infantry drill, target practice, camping, guard duty, and various other exercises, the course covering the entire period of the student's stay at the University.

The act of Congress donating public lands for edu

educational purposes requires that institutions which are the beneficiaries of such donations include Military Science and Tactics in their course of instruction.

The system of practical instruction closely follows that used in the United States Army. It contains a course of gymnastic exercise for the development and improvement of the arms, chest, legs, hands, and feet. Besides being excellent physical training, this instruction has many advantages mentally. The necessity of being alert, listening for each word of command, and acting promptly on it, quickens the wit and cultivates the habit of fixing the attention and concentrating the thoughts. In addition to all this, it inculcates in the student a respect for authority and discipline which is equaled by no other system.

The cadets are organized into two battalions, composed of field staff, band, and six companies. The officers and non commissioned officers are selected from those students who are most proficient in their drill and military studies, and most exemplary in their deportment, the majors, captains, and lieutenants being taken, usually, from the Senior and Junior classes, and sergeants and corporals from the Sophomore and Freshman classes. An office in one of the battalions is one of merit and distinction, and any unbecoming conduct subjects the appointee to reduction to the ranks.

The cadet band, of some twenty pieces, constitutes an interesting feature of the military organization. It receives the best instruction obtainable, practices three hours per week, and takes part in all military ceremonies.

A competitive drill is held annually at the close of the school year, when prizes are awarded for proficiency in this department.

COMPETITION AMONG THE COMPANIES.

At the competitive drill, held June 19, 1900, between the five companies of the corps of cadets of the University of Arkansas, Company "D" made the highest score. The following is a roll of the officers, non-commissioned officers and privates who participated in that contest and were members of the Company at that time:

Taylor, D. W., Captain.
Means, E. D., First Lieutenant.
Berry, E. R., Second Lieutenant.
Wasson, A. W., First Sergeant.

Sergeants.

Henderson, G. D.
Barton, R. B.
Treadway, T. C.

Corporals.

Ware, B. P.
Kinbrough, N. D.
Mitchell, S. A.
Bell, R. D.

Privates.

Adams, J. G.	Dean, S. E.	McGehee, B. G.
Arnold, L. S.	Dickinson, C. W.	Meyer, Percy.
Abercrombie, J. S.	Ellis, W. Y.	Muller, J. F.
Bell, C. Y.	Hanger, A. E.	Orto, A. Z.
Beeler, K. L.	Harrison, R. Y.	Phillips, T. W.
Bisplinghoff, R. L.	Holcomb, G. A.	Pratt, F. H.
Bowles, E. C.	Honnett, A. M.	Ramsey, C. C.
Cook, L. J.	Kennedy, S. A.	Ross, J. E.
Cox, T. M.	Klyce, H. K.	Stone, B. H.
Davis, Thos.	Loper, F. M.	Thompson, J. O.

Warrensburgh, W. B.

CAPTAINS' COMPETITION.

To Captain G. C. Abernathy, of Company "F," was awarded the Sword.

INDIVIDUAL COMPETITION.

To Cadet Private R. J. Middleton, of Company "A," was awarded the Gold Medal.

ARMY APPOINTMENTS.

The three students of the Senior class having the highest grade of merit in this department are reported to the Secretary of War, and their names are recorded in the Adjutant General's office and published in the Army Register for that year. The President of the United States, in appointing officers from civil life, gives preference to those whose names are so recorded. Cadet officers on graduation are brevetted in the State Guard with the rank held by them in the Cadet Battalion at the date of their graduation, and recommendations of the commandant of Cadets as to special military qualifications of the graduates of the military course are filed in the office of the Adjutant General of the State and considered in appointing commissioned officers of the State Guard.

A neat uniform of gray cloth, with brass buttons and black trimmings, is required to be worn by all cadets at drill. The uniform, complete, costs about fifteen dollars, and with ordinary care will last an entire year.

ORGANIZATION OF THE CORPS OF CADETS FOR THE YEAR 1900-1901.

Captain George K. Spencer, U. S. Army, Commandant.

FIELD AND STAFF OFFICERS.

Majors,

George A. Vincenheller.

J. T. Collier.

Second Lieutenant J. W. Baxter, Adjutant.

Second Lieutenant T. C. Treadway, Quartermaster.

Battalion Adjutants,

Second Lieutenant B. F. Davis.

Second Lieutenant C. L. Sadler.

Second Lieutenant W. D. Hobbs, Ordnance Officer.

NON-COMMISSIONED STAFF.

Sergeant Major G. V. Prall. Quartermaster Sergeant R. Alden.

Color Sergeant C. Von Jagersfeldt.

BAND.

First Lieutenant T. E. Sanders, Commanding.

First Lieutenant M. R. Herron, Leader.

Second Lieutenant L. E. Worthley, Assistant Leader.

Principal Musicians.

J. L. Dunn.

R. J. Nelson.

T. M. Billings.

Sergeant F. E. Buchanan. Drum Major E. L. L. Keeler.

Chief Trumpeter M. G. Daily.

COMPANY ORGANIZATIONS.

COMPANY "A"

Captain W. E. Babb.

First Lieutenant A. W. Wasson.

Second Lieutenant R. B. Barton.

First Sergeant B. P. Ware.

Sergeants,

S. A. Mitchell.

R. D. Bell.

P. D. Meyer.

L. J. Cook.

Corporals.

C. L. Holt.

W. H. McLaughlin.

J. F. Muller.

B. Mitchell.

COMPANY "B."

Captain H. L. Ross.

First Lieutenant E. Howell.

Second Lieutenant W. A. Freeman.

First Sergeant R. D. Mesler.

Sergeants.

F. I. Gibson.

D. C. Mooring.

J. Chapman.

A. J. Gladson.

Corporals.

R. E. Curry.

R. E. L. Austin.

C. M. Conway.

H. E. Marshall.

COMPANY "C."

Captain C. C. Curry.

First Lieutenant C. Smith.

Second Lieutenant H. S. Brown.

First Sergeant W. Clancy.

Sergeants.

B. G. Covington.

B. W. Langford.

H. Brewster.

M. H. Mulkey.

Corporals.

V. P. Knott.

C. F. Wood.

H. B. Hill.

J. S. Abercrombie.

COMPANY "D."

Captain V. H. Cochrane.

First Lieutenant H. H. Wilson.

Second Lieutenant G. D. Henderson.

First Sergeant G. Stubblefield.

Sergeants.

R. Lester.

G. G. Hayes.

C. O. Phillips.

W. O. Wilson.

Corporals.

E. V. Leverette.

P. D. Scott.

S. C. Swearingen.

W. M. Harris.

COMPANY "E."

Captain F. I. Brown.

First Lieutenant W. N. Wilkinson.

Second Lieutenant H. E. Buchanan.

First Sergeant J. L. McConnell.

Sergeants.

W. Hight,

A. McGehee.

H. T. Daniels.

E. T. Archer.

Corporals.

C. C. Ramsey.

J. E. Horsfall.

M. L. Cotton.

F. W. Holt.

COMPANY "F."

Captain L. L. Newman.

First Lieutenant C. McRae.

Second Lieutenant W. H. Hudgins.

First Sergeant J. F. Govan.

Sergeants.

O. D. Briggs.

R. J. Middleton.

W. Y. Ellis.

T. Davis.

Corporals.

W. B. Rife.

C. W. Gray.

C. Wood.

W. A. Ruggles.

Agricultural Experiment Station.

R. L. BENNETT, M. S., Director.

W. G. VINCENBELLER, Vice Director and Pomologist.

R. R. DINWIDDIE, M. S., Pathologist and Bacteriologist.

C. L. NEWMAN, B. S., Agriculturist.

ERNEST WALKER, B. S. A., Horticulturist and Entomologist.

GEORGE B. IRBY, B. A., Assistant in Feeding Experiments.

J. F. MOORE, B. S., Assistant Chemist.

The National Government established the Experiment Station as a department of the University in 1887, and maintains it to investigate agricultural problems for the aid of the farmers of the State.

The work of the Experiment Station is divided into the special lines of Agriculture, Horticulture and Entomology; Chemistry, Animal and Plant Diseases; Animal Production, Pomology and Farmers' Institute work. Specialists are employed in each line, and experiments are made both in the field and laboratory in the improvement of soils, the rotation of crops, diseases of plants and domestic animals, in fertilizers, the value of stock foods, dairying, and other matters. Students interested in agricultural subjects are given opportunity to observe the experiments and to acquaint themselves with the work of the Station in its various departments; the bulletins are also available for their use. The experiments and their results are published in bulletins, which are sent free to farmers, stock raisers, and fruit growers of the State, and to others interested in agriculture.

Those who desire the Station bulletins should apply for them to the Director of the Station, Fayetteville, Ark. One application is sufficient to obtain all future bulletins, if desired.

Degrees.

The following degrees are conferred by the University:

For undergraduate work:

Bachelor of Arts (B. A.).

Bachelor of Philosophy (B. Ph.).

Bachelor of Science (B. S.).

Bachelor of Civil Engineering (B. C. E.).

Bachelor of Mechanical Engineering (B. M. E.).

Bachelor of Electrical Engineering (B. E. E.).

Bachelor of Scientific Agriculture (B. S. A.).

For graduate work:

Master of Arts (M. A.).

Master of Science (M. S.).

Mechanical Engineer (M. E.).

Civil Engineer (C. E.).

Electrical Engineer (E. E.).

The number of hours required for graduation in all courses leading to the degrees of B. A., B. Ph., and B. S. is sixty-four, exclusive of military science and tactics.

The courses leading to these degrees have been planned with the view of retaining as required studies those subjects which seem essential for all who are candidates for a liberal degree, and, at the same time, of allowing as large freedom of selection as is consistent with the attainment of a sound education.

NOTE 1 —The figures immediately following each subject refer to the Description of Courses beginning on page 62

NOTE 2 For courses in Engineering see pp. 89, 95, 99; in Agriculture, 106; in Horticulture, 106; in Normal Department, 83; in Music, 111; in Art, 115

NOTE 3 In the Junior Year, B. S. Course, Biology 4 is four hours per week, Biology 5 is five hours per week; hence, if these subjects are taken electives are reduced respectively to seven and six hours.

REQUIREMENTS FOR THE MASTER'S DEGREE.

1. A Bachelor's Degree from this University or another institution in which the course of study pursued is recognized as fully equivalent.

2. That not less than one year intervene between the conferring of the Bachelor's and Master's degrees.

3. That a course of study in one major and two minor subjects aggregating with a thesis sixteen hours per week be pursued in residence at the University for not less than one year. But graduates of this University may do half their work in absence under the direction of the Professors in charge of the subjects chosen, provided that residence at the University during the term preceding final examination for the degree is required.

4. That the major subject covering six hours shall be strictly graduate work and selected in a department in which all undergraduate work has been previously completed.

5. That the two minor studies aggregating eight hours per week shall be chosen from departments in each of which the candidate has already two years' credit, provided that no work credited to the Bachelor's Degree shall be counted toward the Master's Degree.

6. A satisfactory thesis in the major subject, the theme of which shall be approved by the head of the department six months before the final examination. For the thesis a credit of two hours shall be given.

7. That the candidate shall hand to the Professor in charge of the major subject the thesis on or

before the 15th of May. Previous to his final examination the candidate shall be questioned on his thesis by a committee composed of the Professors in charge of the major and minor subjects and a Professor of another department to be designated by the Faculty.

REQUIREMENTS FOR THE DEGREES OF C. E., M. E. OR I. E.

These courses of study are intended to give additional preparation to those students who have finished an undergraduate course in Engineering, for some special line of work to which their previous study has led. The student will have all reasonable liberty in selecting such specialties and will be limited only by certain general requirements. He will be required at the beginning of the year to make up the course which he proposes to follow and to present it to the Faculty, approved by the instructors concerned. If accepted, it will be subject to change only by the Faculty. In general, it is expected that these courses shall comprise one principal subject based on the course already pursued, and two secondary subjects, one or both of which should be closely related to the principal. The graduate course should amount to not less than fifteen recitation hours per week as counted in undergraduate work.

The subject of a thesis for any of the above degrees must be submitted to the Faculty for approval before the middle of the second term.

These degrees will also be given to graduates in Civil, Mechanical, and Electrical Engineering who have been in successful practice of their profession for

three years and who have submitted a satisfactory thesis on a subject approved by the Faculty.

Charges. Graduate students pay \$10 for matriculation and registration, \$10 tuition (non-residents \$5) at the beginning of each session, and \$10 in advance for the final examination. Students who fail to comply with any of these requirements, or who do not each year complete the equivalent of two terms' work in one subject, will be dropped from the rolls. Should such students desire to resume their studies, they must pay for matriculation and registration, as if beginning for the first time. The diploma fee is \$5 in advance in each case.

Graduates attending only undergraduate classes pay the same fee as undergraduates.

Non-resident students have such assistance and instruction in their studies as can be conveniently given by correspondence.

HONORS.

Students who have attained grade "E" in work aggregating fifty hours per week (counted on the basis of a four years' course) are granted degrees "with special distinction."

Students who have attained grade "E" in work aggregating thirty-two hours per week, or grade "E" or "G" in work aggregating fifty hours per week, are granted degrees "with distinction."

Description of Courses.

ANCIENT LANGUAGES.

J. C. FUTRALL, Professor.

E. F. SHANNON, Associate Professor.

In this department the following courses are offered:

LATIN.

1. *Sallust, Cicero and Virgil* 3

An accurate knowledge of the Latin forms is insisted upon; exercises in prose composition taken from Bennett's Latin Composition.

Associate Professor Shannon.

Required of Freshmen in the B. A. and B. Ph. Courses.

2. *Cicero and Livy* 3

Systematic study of the grammar; exercises in prose composition, based chiefly upon the authors read in class; sight reading; Roman literature.

Professor Futrall.

Required of Sophomores in the B. A. and B. Ph. Courses.

3. *Horace, Livy and Tacitus* 3

Large amounts of each author read in class; parallel reading assigned; study of the grammar continued; the metres of Horace; prose composition; Roman literature.

Associate Professor Shannon.

Optional with Greek 3 for Juniors in the B. A. Course.

4. *Sight Reading Course* 2-1

Professor Futrall.

Elective for students who have completed Course 2.

5. *Roman Poets* 3

Readings will be taken from Plautus, Terence, Catullus, Horace and others, and the attention of the students will be directed rather to the literary side of the authors read than to grammatical and syntactical peculiarities.

Professor Futrall.

Elective for students who have completed Course 3.

Text-books: Bennett's and Gildersleeve's Grammars; Wilkin's Primer of Roman Literature; Cruttwell's Roman Literature. Any approved edition of the Latin authors may be used, except when certain editions are prescribed. Harper's and White's Lexicons are recommended.

GREEK.

1. *Elementary Course* 4

White's Beginner's Greek Book, with selections for reading. A thorough mastery of the forms and constructions given in this book is required.

Associate Professor Shannon.

Required of Freshmen in the B. A. Course.

2. *Xenophon and Lysias* 5

This course is intended to familiarize the student with all the ordinary Attic forms and constructions; frequent exercises in oral and written translation of English into Greek, based upon the text read, are given, and some practice in sight reading; Goodwin's Grammar.

Professor Futrall.

Required of Sophomores in the B. A. Course.

3. *Homer, Herodotus and Plato* 3

Systematic study of the grammar; prose composition; Greek literature; sight reading.

Associate Professor Shannon.

Optional with Latin 3 for Juniors in the B. A. Course.

4. *Thucydides, Demosthenes, Aristophanes and Sophocles*3

The Course will be conducted on the same plan as Latin 5.

Professor Futrall.

Elective for students who have completed Course 3.

Text-books: Goodwin's Revised Greek Grammar; Goodwin's Greek Moods and Tenses; Collar and Daniell's Prose Composition, based on Xenophon's Anabasis; Higley's Exercise in Greek Composition. Any approved edition of the Greek authors may be used, except when certain editions are prescribed. Liddell and Scott's Lexicons are recommended.

ENGLISH AND MODERN LANGUAGES.

WILLIAM A. READ, Professor.

HADGIE DAVIES, Associate Professor.

COLBERT SEARLES, Associate Professor.

*CLARA, EARLE, Instructor.

†ALLIE B. DEUPREE, Instructor.

ENGLISH.

1. *Elementary Course*3

Thorough review of the essentials of English grammar, with frequent practice in composition. The course includes a study of the poets of America. Text books: Baskervill and Sewell's English Grammar; Matthew's Introduction to American Literature; Riverside Literary Series.

Misses Davies and Deupree.

Required of all Freshmen in the B. A., B. S., B. Ph. and Engineering Courses.

Required of all Sophomores in the Agricultural Course.

*Absent on leave. †For 1900-1901.

2. *Rhetoric and English Literature* 3

Rhetoric and composition; weekly themes and two essays each term. Text-books: Carpenter's Exercises in Rhetoric and English Composition; Pancoast's Introduction to English Literature.

Miss Davies.

Required of all Sophomores in B. A., B. Ph. and B. S. Courses. Elective for all others who have completed English 1.

3. *The English Novel in the Nineteenth Century* . . 2

A critical study of selected masterpieces, with parallel readings, and essays.

Miss Davies.

4. (a) *Shakespeare*; (b) *Poetics* 2

Course a: A study of representative plays.

Course b: Lectures on the origin and development of important verse forms. Subjects will be assigned for investigation.

Professor Read.

5. *Old English* 2

An introductory course for students beginning the study of the language. Text-book: Bright's Anglo-Saxon Reader.

Professor Read.

6. *Middle English* 1

A course in the interpretation of selected Middle English texts. In 1901-1902, Havelock (ed. Holthausen).

Professor Read.

7. *Romantic Poets of the Early Nineteenth Century* 1

Selections from Byron, Shelley and Keats.

Professor Read.

NOTE 1.—Juniors are required to take either Course 3, 4, or 5; Seniors may elect any one of these three.

NOTE 2.—Course 6 is optional with Course 7 for Seniors.

GERMAN.

1. *Elementary Course* 3

Thomas's Grammar; Brandt's Reader; written and oral exercises; parallel reading.

Professor Read.

Required of all Freshmen in B. S. Course and of Sophomores in B. Ph. Course not taking French 2. Elective in all other courses.

2. *German Literature of the Nineteenth Century*. 3

Representative works of Sudermann, Hauptmann, and Wildenbruch; Harris's German Composition; Wells's History of German Literature. This course is conducted in German.

Professor Read.

Required of Sophomores in B. S. Course and of Juniors in B. Ph. Course not taking French 2. Elective in all other courses.

3. *German Literature of the Eighteenth Century*. 2

Representative works of Lessing and Schiller.

Associate Professor Searles.

4. *Goethe* 2

Selected masterpieces of Goethe.

Professor Read.

5. *Advanced German Composition* 1

This course is designed particularly for those intending to teach German.

Professor Read.

6. *Scientific German* 2

Brandt and Day's Reader; Walther's Meereskunde.

Professor Read.

Elective for those who have completed Course 1.

NOTE.—Courses 3, 4, and 5 are elective for those who have completed Courses 1 and 2.

FRENCH.

1. *Elementary Course*3

Deborde's Grammar; Kuhns's French Reading for Beginners, supplemented by easy texts if time permits. Persistent drill in pronunciation.

Associate Professor Searles.

Either French 1 or German 1 required of Sophomores in the B. Ph. Course; elective for all others.

2. *French Reading*3

Dumas, L'Evasion du Duc de Beaufort; Pailleron, Le Monde ou l'on s'ennuie; Bowen, French Lyrics; Balzac, Le Cure de Tours; Ohnet, La Fille du Depute.

Miss Deupree.

Either French 2 or German 2 required of Juniors in the B. Ph. Course, elective for all others.

3. *French Composition*2

Miss Deupree.

Elective for those who have completed Course 1.

4. *The French Classic Drama*3

Critical study of the great French dramatists; lectures in French; reports on assigned topics.

Associate Professor Searles.

Elective for those who have completed Courses 1 and 2.

5. *Nineteenth Century Literature*3

Lectures in French; reports based on outside reading.

Associate Professor Searles.

This Course is designed to complete the work of Course 4, but by special permission of the instructor may be taken by those who have completed Course 2.

6. *French Conversation*2

Reading and discussion of easy texts in the French language.

Miss Deupree.

Elective for those who have completed Course 1.

7. *Old French and the Phonetic Development
of the Language*2

This course is designed especially for those who expect
to teach French.

Associate Professor Searles.

Elective for those who have completed Courses 1, 2, and 3.

NOTE.—Course 6 counts for only one hour in the number of hours required
for graduation.

SPANISH.

1. *Elementary Course*3

Knapp's Grammar; Matzke's Spanish Reader; El Si de
las Ninas.

Associate Professor Searles.

2. *Spanish Classic Writers*3

Study of representative authors; advanced grammar and
composition.

Miss Deupree.

ITALIAN.

1. *Elementary Course*3

Bowen's Italian Reader; De Amicis' Cuore; grammar to
be selected.

Associate Professor Searles.

2. *Dante*3

La Vita Nuova; Divina Commedia. Lectures on the
poet's life and period.

Associate Professor Searles.

This Course will not be given until 1902-1903.

NOTE.—All courses in Spanish and Italian are Junior and Senior electives.

MATHEMATICS AND ASTRONOMY.

GEO. W. DROKE, Professor.

B. J. DUNN, Associate Professor.

In this department the following courses are offered:

MATHEMATICS.

1. (a) *Solid Geometry (first term)* 3
Beman and Smith's New Plane and Solid Geometry.
- (b) *Plane Trigonometry (second term)* 3
Crawley's Trigonometry.

Required of all Freshmen.

2. *Algebra* 2

Hall and Knight's Algebra for Colleges and Schools.

Required of all Freshmen engineers; optional for all Freshmen in other courses.

3. *Algebra, Conic Sections* 3

Required of all Sophomores in the B. S., B. Ph. and B. A. Courses.

4. *Determinants, Analytic Geometry* 3

Tanner and Allen's Analytic Geometry.

Required of Sophomore engineers.

5. *Algebra (continuation of Course 2), Spherical Trigonometry, Calculus* 2

6. *Differential and Integral Calculus* 3

Osborne's Calculus.

Required of Junior engineers.

7. *Spherical Trigonometry, Analytic Geometry* 3

Elective for Juniors and Seniors in the B. S., B. Ph. and B. A. Courses.

8. *Spherical Trigonometry, Theory of Equations, Determinants* 2

Junior and Senior elective.

9. *Analytic Geometry of Three Dimensions, and
Differential Equations* 3

Books of reference: C. Smith's and Frost's Solid Geometry, Salmon's Geometry of three Dimensions.

Senior elective.

Those who desire to make pure Mathematics their major subject are advised to take Course 4 instead of Course 3 in the Sophomore year, Courses 2 and 6 in the Junior, and Courses 8 and 9 in the Senior.

GRADUATE COURSES.

10. *Modern Pure Geometry, Modern Analytic
Geometry* 3
11. *Advanced Integral Calculus, Modern Higher
Algebra* 3
12. *Projective Geometry, Theory of Functions* . . . 3

ASTRONOMY.

13. *Descriptive Astronomy, Lectures and Recita-
tions* 3
- Todd's New Astronomy. First term.
14. *Spherical Astronomy (second term)* 3

The class in Astronomy has the use of a new four-inch telescope, sextant, celestial globe, and other simple instruments. The "Laboratory Method" of instruction is followed as far as practicable.

HISTORY AND POLITICAL SCIENCE.

A. F. LEWIS, Professor.

The aim of this department is to study the moral, social and political forces which have operated in the development of national life and to apply the lessons

thus learned to the solution of the social problems of our own time. A good course in general history may be obtained by taking courses 1 and 2, while a similar course in American and English history is to be found in courses 3, 4 and 5. Course 1 is required of all Freshmen in the B. A. course. It is strongly urged that all candidates for the Ph. B. and B. S. degrees take this course in their preparatory work so that they may be prepared for course 2 in their Sophomore year and for other elective courses in their Junior and Senior years. Those electing any of the courses, 6 to 11 inclusive, must have a sufficient preparation to pursue with profit the courses chosen. In general courses 1 and 2 will be required prior to taking courses 6, 7, 10 and 11, and courses 1 and 2 or 3, 4 and 5 will be prerequisites to courses 8 and 9.

COURSES.

1. *History of Greece and Rome*2

Required of all B. A. students in Freshman year. Students in Ph. B. and B. S. courses will take this course in Sophomore year, unless they have previously taken it in the preparatory school, in which case they will take Course 2 instead. Text books: Oman's *History of Greece* and Leighton's *History of Rome*. These will be supplemented by parallel reading and topical research.

2. *Medieval and Modern History*3

This course may be taken in the Sophomore year by all students who enter with Greek and Roman history, and in the Junior or Senior year by all who have taken Course 1. Duruy's *Middle Ages* and Duruy's *Modern Times* supplemented by reports and prescribed readings.

3. *American Political and Constitutional History*. .2

From the Revolution to the present with a review of the colonial period. May be elected by all collegiate students. Lee's *Advanced School History and Curry's Southern States*, with lectures, reports and parallel reading.

4. *American Civil Government and Constitutional Law*1

May be taken with Course 3 or separately. Fiske's *Civil Government*, with supplementary reading.

5. *Political and Constitutional History of England*.2

General College elective. Montgomery's *History of England* and Feilden's *Short Constitutional History of England*, with parallel reading, topical research and lectures. The first term will be given to the political history which may be taken separately as the equivalent of a one hour elective.

6. *Era of the Renaissance and Reformation*
(first term)2

This course is based on Seebohm's *Era of the Protestant Revolution*, which is largely supplemented by lectures, reports, and parallel reading.

7. *French Revolution and Napoleonic Era*
(second term)2

Based on Morris's *French Revolution and First Empire*, supplemented as in Course 6.

8. *Comparative Study of American and European Governments* (first term)2

Selections from Woodrow Wilson's *State*, with parallel reading and topical research.

9. *International Law (second term)*2
Davis's Elements of International Law, prescribed readings, and reports.
10. *Nineteenth Century History, with Special Reference to Germany*1
Müller's Political History of Recent Times, reports and lectures.
11. *History of Civilization*1
Guizot's History of Civilization, edited by Knight, topical research and lectures.

ECONOMICS AND SOCIOLOGY.

S. J. McLEAN, Professor.

The courses offered in this department are designed to afford such instruction as will be advantageous to those who intend to enter public life, or those callings which will bring them closely in touch with the activities of citizenship. Course 1 is required before more advanced courses in this department are taken.

1. *Principles of Economics (both terms)*2
Recitations, prescribed readings, reports and debates.
Text-book: Walker, Political Economy.
2. *Industrial History of America and Europe since 1763 (first term)*3

The leading industrial facts of this period, including panics and trusts, are considered. A detailed study of some of the more important industries will also be made. Lectures, reports, and prescribed readings. Selected portions of Rand's Economic History will be studied.

3. *Banking (first part of second term)*3
The principles of Banking and the history of Banking Systems. Lectures, recitations, reports and readings. Text-book: Dunbar, Chapters in the Theory and History of Banking.
4. *Money (latter part of second term)*3
The principles of Money and the history of Monetary Systems are considered.
5. *Tariff History and Problems (first term)*2
United States, England, France, and Germany. Special attention will be devoted to the tariff history of the United States. Text-book: Taussig, Tariff History of the United States. This will be supplemented by lectures and use of government documents.
6. *History of Economic Thought, from Plato
and Aristotle to the Present (second term)* .2
Text-book: Ingram's History of Political Economy; supplementary readings and reports will also be required.
7. *Public Finance (first term)*3
Principles and history of taxation, management of public debts, consideration of governmental activities, etc. Text-book: Plehn, Introduction to Public Finance. Lectures, readings, and use of government documents.
8. *Transportation, Its History and Problems
(second term)*3
The economic aspects of water transportation, the great lakes, canal systems, and the Mississippi; the evolution of the railroad system, railroad geography, rate making, State versus private ownership, methods of government control, railroad finances, etc. Lectures, prescribed readings, and use of Railroad Commission Reports. Text-book: Hadley, Railroad Transportation.

9. *Principles of Sociology (first term)*2
This course considers the elements and conditions of social growth and progress. Recitations, lectures and reading of assigned chapters in Spencer's Principles of Sociology and in Gidding's Principles of Sociology. Text-book: Fairbank's Introduction to Sociology.
10. *Problems of Social Growth (second term)*2
Trade-unionism, arbitration and conciliation, socialism, communism, co-operation and profit-sharing. Lectures and reports. For reference: Ely, The Labor Movement in America, and Ely, French and German Socialism.
11. *Commerce (first term)*2
Theory of foreign commerce; investigation of the commercial resources of the leading countries of the present. Students will be expected to acquaint themselves with the United States Consular Reports. Text book: Chisholm, Smaller Commercial Geography.
- This course will not be offered during the year 1901-1902.
12. *Labor Legislation (second term)*2
History and critical investigation of the attitude of the State towards Labor; apprenticeship laws, combination laws, trade union recognition, factory legislation, etc. For reference: Stimson, Handbook to the Labor Law of the United States.

This course will not be offered during the year 1901-1902.

CHEMISTRY AND PHYSICS.

A. E. MENKE, Professor.

P. H. WALKER, Associate Professor.

CHEMISTRY.

1. *General Inorganic Chemistry*3
Lectures and recitations twice a week; laboratory work one afternoon throughout the year.

Professor Menke.

Required for Freshmen B. S., all Engineering Courses, and B. S. A.

2. *Chemical Philosophy* 2

Twice per week, second term. This course supplements the instruction in theoretical chemistry given in Course 1.

Associate Professor Walker.

3. *Analytical Chemistry.*

(a) Recitations twice per week, first term. (b) Laboratory work two afternoons per week for engineering students, three afternoons for scientific students, throughout the year. The recitations are occupied with the discussion of problems depending on the principles of qualitative and quantitative analysis. The object of these discussions is to enable the student to understand the methods of separation as well as to be able to follow them practically. In the laboratory a large number of substances, both simple and complex, are analyzed. Chemistry 13 may be taken as a part of this course.

Associate Professor Walker.

4. *Organic Chemistry* 3

Recitations three times per week throughout the year with laboratory work, if desired. Bernthsen's Organic Chemistry.

Associate Professor Walker.

5. *Quantitative Analysis* 3 to 8

Laboratory work 6 to 16 hours per week. Practice in gravimetric and volumetric analysis.

Associate Professor Walker.

6. *Quantitative Analysis* 4

Second course. Analysis of agriculture and food products. First term.

Professor Menke.

7. *Technical Chemistry* 3

Three times per week throughout the year. A study of industries having chemical principles and processes for a basis.

Associate Professor Walker.

8. *Physical Chemistry* 3

Chiefly laboratory work; determination of molecular weights according to the various methods in common use; thermochemical work, measurement of electric conductivity of electrolytes; practice with polariscope, refractometer, etc.

Associate Professor Walker.

9. *Assaying* 2 to 3

Class meets at convenience of the instructor. Preparing and testing reagents, making cupels, etc., and assaying samples of furnace and mill products. Second term. Text-book: Ricketts & Miller.

Professor Menke.

10. *Toxicology* 1

Once a week throughout the year. A working knowledge of qualitative and quantitative analysis is a condition requisite for admission to this class.

Professor Menke.

11. *Gas Analysis* 1

Practical work once a week throughout the year. This course is designed particularly for technical students.

Professor Menke.

12. *Metallurgy* 3

Three times per week. First term.

Professor Menke.

13. *Water Analysis*3

One term, three times per week, for civil engineering students.

Associate Professor Walker.

14. *Electro-Chemistry*2

Twice per week the first term. For Junior electrical engineering students.

Associate Professor Walker.

PHYSICS.

1. *General Physics*3

Recitations twice and laboratory work once per week throughout the year. Recitations and experimental lectures on mechanics, sound, heat, light, magnetism, and electricity.

Professor Menke.

Required for Sophomore B. S. and Engineering students.

2. *Electricity and Magnetism*3

Recitations twice and laboratory work once per week throughout the year. Text book: Silvanus Thomson's Electricity and Magnetism.

Professor Menke.

Required for Sophomore E. E. students.

3. *Physical Measurements*2

Measurements in mechanics, sound, heat, light, magnetism, and electricity. Manual: Sabine.

Professor Menke.

DEPARTMENT OF BIOLOGY.

F. W. PICKEL, Professor.

The courses in this department have been arranged to meet the needs of three classes of students: Those who desire to become acquainted with the fundamental

principles of plant and animal life; those who contemplate the study of medicine; and those wishing to go more thoroughly into the study of biological science to obtain the technical training necessary for subsequent investigation or for teaching.

1. *General Biology*3

This course serves as an introduction to the whole field of biological science, and should be a part of the general education of every student. Types of plants and animals will be dissected and studied in the laboratory and the essential truths of biology emphasized. One recitation and laboratory four hours per week throughout the year. Textbook: Parker's Lessons in Biology.

2. *Botany*3

In this course special attention is paid to the morphology, physiology and ecology of plants, but due attention is given to the systematic classification of plants in the second term, and each student is required to collect and write a technical description of a certain number of plants. The geological history of plants and the origin of cultivated plants will be briefly considered. Recitations and laboratory six hours per week throughout the year. Text-books: Barnes's Plant Life; Chapman's Flora of Southern States.

3. *Botany.*

This course will consist of lectures assigned readings and laboratory work in morphology, physiology or taxonomy. *Fix*
~~Work and hours arranged after consultation~~
~~with the head of the department.~~

Required: Botany 2.

4. *Bacteriology*4

An introduction to the subject and instruction in laboratory technique the preparation of nutrient media, the

characteristics of bacteria, the kind and effects, isolating and keeping pure cultures, microscopical preparations, the study of bacteria found in soil, in water and in air; study of pathogenic forms and their relation to disease. One lecture and six hours laboratory, first term.

Required: Chemistry 1. Biology 1.

5. *General Zoology*3

A general course in Invertebrate and Vertebrate Morphology. Attention will be given to the fundamental facts of zoological science, and the laws of development, heredity, variation, correlation, etc. In connection with the laboratory work in the course instruction will be given to such students as desire to learn methods of preparing bird skins and mammal skins for laboratory and museum specimens. One recitation and four hours laboratory per week throughout the year. Text-books: Hertwig's *Essentials of Zoology*; Kingsley's *Comparative Anatomy*. Reference books: McMurrich's *Invertebrate Zoology*; Text-book of *Zoology* (Parker & Haswell); Wiedersheim's *Comparative Anatomy of Vertebrates*.

6. *Entomology*4

Lectures relating to the metamorphosis, anatomy, physiology, and habits of insects. Special importance will be given to beneficial and injurious insects, with remedies for the latter. Laboratory work will consist in the study of typical forms with the aid of the guide. This will be followed with determinations of families and practical studies of life histories of insects, and with methods of collecting, breeding and preserving specimens. Two lectures and four hours laboratory work per week. Text-books: Comstock's *Laboratory Guide*; Harris's *Insects Injurious to Vegetation*. In all courses in Botany and Zoology, field work, when practicable, will form an important feature of the work.

7. *Mammalian Anatomy*5

This course is offered to students intending to study medicine, but is open to any student who has completed Course 1 in Biology. It includes a thorough dissection of one of the higher mammals, e. g., the dog, cat or rabbit; a short course of instruction in histological and embryological methods of technique to acquaint the student with the principles of Histology and Embryology. Two lectures and six hours laboratory per week throughout the year. Reference books: Gray's Human Anatomy; Reynold's The Vertebrate Skeleton; Marshall's Embryology; Stohr's Histology.

8. *Physiology*4

The physiology of foods, digestion and nutrition; the blood, circulation, and respiratory mechanism; the excretion, especially analysis of urine; functions of brain and spinal cord; physiology of nerve and muscle. Two lectures and four hours laboratory a week, second term.

Required: Chemistry 1. Elementary Physiology.

9. *A Special Course in Nature Study, its Aim, Method, etc., and Systematic Science Teaching will be offered to students who expect to teach.*

One lecture per week throughout the year.

GEOLOGY AND MINERALOGY.

A. H. PURDUE, Professor.

1. *Surface Geology*3

(a) Recitations three times a week on the origin of topographic features, with special attention to the development of streams and stream features, followed by
(b) a detailed study of the physiography of the United States. Text books: Russell's Rivers of North America and Geikie's Earth Sculpture, with collateral reading.

2. *General Geology, Continental Evolution, and Economic Geology*3
 - (a) Structural and Dynamic Geology. Recitations and lectures three times a week during the first term. Text: Scott's Introduction to Geology, with outside reading.
 - (b) Continental Evolution. Lectures, with collateral reading, during a part of the second term, on the Evolution of the North American Continent.
 - (c) Economic Geology. Lectures, with collateral reading, following course (b) on the formation, modes of occurrence, uses and geographic distribution of ore deposits.
3. *Practical Geology*1

Field and laboratory work two hours a week throughout the year, with the construction of geological maps and sections, topographic maps, and relief maps.
4. *Paleontology*3

Laboratory work six hours a week throughout the year, on the determination of fossil organisms.
5. *Crystallography and Mineralogy*3
 - (a) Lectures and recitations two hours a week during the first six weeks on the elements of Geometric Crystallography.
 - (b) Laboratory work (two hours) three times a week following course (a) and extending through the year. Determination of minerals before the blowpipe, and in the wet way. Text: Determinative Mineralogy, Brush.
6. *Field and Special Courses*3

Students electing Geology as a major will be expected to spend sufficient time in the field for the careful investigation of local geological problems, and to present acceptable theses on the work done. Special courses will be arranged for those who wish to elect work in addition to what is required.

NORMAL COURSE.

JUNIUS JORDAN, Professor.

Section 6974 of the Revised Statutes of the State is as follows: "The State Superintendent of Public Instruction shall have power to grant State certificates, which shall be valid for life, unless revoked, to any person in the State who shall pass a thorough examination in all those branches required for granting county certificates, and also in algebra and geometry, physics, rhetoric, mental philosophy, history, Latin, the Constitution of the United States, and of the State of Arkansas, natural history, and the theory and art of teaching.

This course includes all the branches required for a State certificate in accordance with the law, and leads to the degree of Licentiate of Instruction (L. I.).

Students who have completed the Normal Course and who wish to continue work for a regular university degree, will be allowed proper credits on the subjects mastered in this department.

FRESHMAN YEAR.

	Hours per week.
English 1	3
Latin 1	3
Mathematics 1	3
Biology 1.....	3
Pedagogics 1, 2, 3, 4	5

SOPHOMORE YEAR.

English 2	3
Mathematics 2	3
History 3, 4	3
Physics 1	3
Pedagogics 5, 6, 7, 8	5

Recitations and lectures in Pedagogy 1, three times a week, and in Pedagogy 2, twice a week, first term.

Pedagogy 3, three times a week, and Pedagogy 4, twice a week, second term. Gordy, Dexter and Garlick, Sharp, Seeley.

Pedagogy 5, three times a week, and Pedagogy 6, twice a week, first term. Hill, Compayre.

Pedagogy 7, three times a week, and Pedagogy 8, twice a week, second term. Barnett, Hinsdale, Harris.

PEDAGOGY.

JUNIUS JORDAN, Professor.

The graduates of the University are filling acceptably many of the best educational positions in the State and the demand now is greater than the supply. The need of professionally trained teachers is actively increasing, and the facilities heretofore afforded at the University have been enlarged so as to meet the necessity. The Normal department has been well equipped with needful devices, apparatus and library, and the choicest educational literature and reading is daily supplied. The live problems of the hour are subjects in the regular work of lectures, discussions and theses. Besides the need of more thorough efficiency in the teaching force in common schools, there is a strenuous demand for superior skill and power in our graded school. The energy of expansion in educational interests, consequent upon the growth of population, wealth and revenues, is manifested by the increase in the number of special school districts and high schools. It is further noticed in improved buildings, equipments and appointments. This higher expression of progressive pub-

lie sentiment insures the demand for professionally trained teachers—those who understand teaching as a science and an art, and who know the history of education and something of its problems and developments. It is no longer a credit to the State that such efficiency and power has been heretofore sought beyond our borders.

Granting the vast wealth of equipment in Normal schools in the Eastern States and the acuteness of their professional training, yet those who study Pedagogy within the political, civil and sociological environments of their own State are prepared to work more effectively for the pupil and for the commonwealth than those educated elsewhere and who are strangers to the problems and conditions that confront us in Arkansas.

The department of Pedagogy was organized by the Board of Trustees to provide the course of study and work that is necessary, as follows:

1. To increase skill and efficiency in organization, methods, management, and teaching in our rural, or ungraded schools.
2. To qualify teachers for the higher grades embodied in the studies necessary for State license.
3. To prepare teachers for professional skill in supervision, either as principals or superintendents.
4. To give increased scope and development to our secondary schools.
5. To elevate and maintain in the State a greater pride and a higher professional standard.

The full course of Pedagogies will embrace the following subjects, supplemented by cognate readings, lectures and discussions.

Methods and Management.
 Organization and Teaching.
 Psychology as Applied to Education.
 Theory and Art in Primary Schools.
 Practice Methods with Model Classes.
 School Supervision.
 School Architecture, Sanitation, and Hygiene.
 History and Science of Education.
 Comparative Methods—European and American.
 Ancient and Modern Systems Compared.
 History of Educational Epochs and Reformers.
 Effects on Modern Civilization, Caused by the Improved
 Science and Art of Pedagogy.
 Ethics of the Schoolroom and of the Profession.
 Ethics—Personal, Social, National.
 Physiological—Psychology.
 Lectures and Experimental Work in Neurology.
 History of Education in the United States.
 History of Education in Arkansas.
 Comparative Systems in the States.
 Arkansas School Laws.
 School Laws of the Various States.

The Department of Pedagogy is partially correlated with the work necessary for the degree B. Ph., and on the completion of the Normal course, students may continue Junior work in this course, getting credit for those studies satisfactorily passed as requirements in the regular course.

DEPARTMENT OF PEDAGOGY.

1. *Elements of Psychology and Pedagogy.*

Three times a week with lectures. Readings: Lives of Pestalozzi and Horace Mann.

2. *Teaching and Organization.*

Methods and Management; twice a week. Readings: King's School Interests and Duties; History of Education in Arkansas.

3. *Applied Psychology.*

Lectures on Pedagogy, three times a week. System and Science of Methods. Practical work with model classes.

4. *History of Education.*

Ancient and Modern Systems Compared; twice a week. Studies in Education, Hinsdale, Harris. Arkansas School Law.

5. *Psychology.*

Psychological Foundations of Education; three times a week. Lectures on Neurology, with experiments and investigations in the department of Biology. Reading: Boen's History of Education in the United States.

6. *History of Pedagogy.*

Educational Epochs and Reformers; twice a week. Ethics as to personal and relative rights and duties. Ethics of the Schoolroom and Professional Ethics; once a week.

7. *Teaching and Organization with Special Reference to Secondary Schools.*

Burnett's School Supervision, three times a week. Architecture, Sanitation and Hygiene; once a week.

8. *Modern Educational Development.*

European and American systems compared. Effects on modern civilization of the improved standards of Pedagogics. Comparative study of the school laws of the various States; three times a week.

On the completion of the full course in Pedagogics, students will be required to write theses on the Public School System of Arkansas, defects of the school law and how remedied; educational development in the State.

PHILOSOPHY.

JUNIUS JORDAN, Professor.

The course offered in this Department consists of recitations, lectures, and free and full discussions by the members of the class. In connection with a careful examination of the views and opinions of leading thinkers, students are encouraged to study their own mental phenomena and to subject to the test of individual consciousness the various theories which come under investigation. Due attention is given to the recognized contributions of modern Physiology to Psychology.

As introductory to this part of the subject, the Professor of Biology gives a course of lectures with accompanying laboratory work in Neurology, which all students whose course includes Pedagogics and Psychology are required to attend during a part of the second term in Sophomore Pedagogics, and Junior work for the University degrees.

PSYCHOLOGY.

1. Study, investigation, and discussion of the various mental phenomena as involved in the intellectual processes of Knowing, Feeling, and Willing. An examination of the various theories of consciousness, as set forth by Grecian, European and American Philosophers. Text-books: Stout, Ladd's Outlines of Descriptive Psychology. Application of principles to Education. Three times a week.

2. *Elements of Ethics.*

Comparative Ethics. The bearing on the moral standard of the theories of Evolution. Sociology, Biology, Economics, and Political Economy. Three times a week. Text-books: Mackenzie, Paulsen.

3. *Logic.*

Text-book: Hyslop. Reference books: Mills, Bain, Hamilton. Twice a week.

4. *History of Philosophy.*

An outline of the Ancient, Media val and Modern theories. The history of European morals from Charlemagne to the present time. The development of Ethics in the progress and economies of the national life of the United States. Three times a week. Text-books: Webber, Scwegler. References: Uberweg, Leckey.

MECHANICAL ENGINEERING.

CHAS. E. HOUGHTON, Professor and Superintendent of Mechanic Arts.

B. N. WILSON, Adjunct Professor and Assistant Superintendent of Mechanic Arts.

*MACK MARTIN, Assistant Superintendent of Mechanic Arts.

J. L. ROSS, Instructor in Iron Working and Forging.

Two courses are offered, a four years' course leading to the degree of B. M. E., and a short course of two or three years, depending on the preparation of the student.

While the major part of a course in Mechanical Engineering necessarily consists of scientific and technical studies, the four years' course provides for instruc-

*Absent on leave 1900-1901.

tion in English and the modern languages, and offers electives that may be taken in other than technical subjects.

Besides the mathematical and scientific studies which constitute the necessary preparation for the study of the engineering branches, instruction is given in mechanics, machine design, theory of steam and gas engines, etc. Special attention is given to the practical application of the truths and the theories taught in the class room, a large part of the time being devoted to shop work, drawing, and laboratory practice.

Sufficient instruction is given in the theory and use of electrical machinery to enable the student to use it intelligently.

In the second term of the Senior year the student is offered an elective in the branch of mechanical engineering in which he wishes to specialize.

1. *Shop Work* Hours as assigned.

- (a) Woodworking. Principles of carpentry and joinery, exercises in wood turning.
- (b) Founding. Green sand molding. Melting and pouring brass and iron.
- (c) Forging. Management of fire; drawing and welding, riveting and tempering, casehardening and annealing.
- (d) Patternmaking. Practice in making patterns, care and use of woodworking machinery.
- (e) Ironworking. Chipping, filing, turning, planing, drilling, grinding; erection of machinery.
- (f) Advanced work in any of the above courses.

2. *Mechanical Drawing.*

Geometrical drawing; copying machine drawings; working drawing from machine parts; tracing; blue printing. One year, four hours per week.

3. *Machine Design* 2 and 3

Kinematics of machinery; design of gear teeth, cams, link motions, etc. Two hours' recitation per week. One hour's recitation; four hours' drawing per week, second term. Text-book: *Machine Design*, Smith.

4. *Mechanics and Hydraulics* 4

Statics and dynamics, strength of materials; hydraulics. Four recitations per week for one year. Text-book: *Mechanics of Materials and Hydraulics*, Merriman.

4a. *Elementary Mechanics* 3

An elementary course in mechanics and hydraulics.

5. *Steam Machinery* 3

Elementary thermodynamics; history of the steam engine, comparison of types of steam engines, boilers, pumps, etc., valve gears. Text-books: *Steam Engine*, Ewing; *Valve Gears*, Halsey. Three recitations per week.

6. *Experimental Engineering* 2

Calibration of engineering instruments, indicators, steam gauges, planimeters, nozzles, weirs, etc.; tests of the materials of construction in tension, torsion, compression, and bending; complete engine and boiler trials; special investigations. Text book: *Experimental Engineering*, Carpenter. Four hours laboratory work per week.

7. *Steam and Gas Engines*4
Theory of steam and gas engines, problems in steam engine and boiler design. One recitation, three hours drawing.
8. *Hydraulic Machinery*2
A study of the design, construction, and operation of water wheels and pumping machinery. Two recitations per week, second term.
9. *Cotton Gins, Compresses and Oil Machinery*2
Lectures on the machinery now in use and discussion of improvements. Two hours per week, first term.
10. *Refrigerating Machinery*2
Comparison of the machinery used in the different systems; methods of ice making, cold storage. Two lectures per week, second term.
11. *Heating and Ventilating*2
Principles of ventilation; the different systems of heating, by steam, hot water, and air; specifications. Text-book: Heating and Ventilation, Carpenter. Two hours per week, second term.
[Courses 10 and 11 will not both be given in the same year; they may be taken together as one two-hour course.]
12. *Steam Engineering*1
Mechanical engineering of power plants, selection of machinery for the equipment of power stations; plans and specifications. One lecture, and six hours' drawing per week, second term.
13. *Machinery and Mill Work*4
Discussions of the different methods of distributing power in mill work, considerations controlling the design of the power plant; specifications. One hour lecture, and six hours' drawing per week, second term.

14. *Railroad Engineering*4
 Design and construction of locomotives; repairs for rolling stock; discussion of the problems relating to the mechanical engineering of railroads. One hour lecture, and six hours' drawing per week, second term.

Courses 9 to 14, inclusive, are open to Engineering Seniors.

The department reserves the right to withdraw any course not elected by four or more students.

All elections to be made subject to the approval of the Professor of Mechanical Engineering.

MECHANIC ARTS COURSE.

This course is designed to meet the wants of two classes of students:

First. Those who are not able to spend the time required for the completion of the four years' course.

Second. Those who lack the necessary preparation for admission to collegiate classes, and do not wish to become candidates for a degree.

Special attention is given to instruction in shop work and drawing, sufficient time being given to the former to enable a student to become familiar with all its branches, and acquire proficiency in some chosen one. The time spent in the drawing room will enable the student to make and understand the machine drawing.

In the last year the technical instruction is designed to give such an elementary knowledge of mechanics, machine design, and steam machinery, as will enable the student to use and care for machinery intelligently. No diploma is awarded, but a certificate of proficiency will be given on the completion of the course.

CIVIL ENGINEERING.

J. J. KNOCH, Professor.

V. H. COCHRANE, Instructor in Drawing.

H. M. HUBBINS, Instructor in Stereotomy and Drawing.

CARL L. SADLER, Instructor in Surveying.

The design of this department is to furnish a course of theoretical instruction, accompanied by illustrations and as much of engineering practice as can well be taught in schools. This course will give the student a knowledge of the fundamental principles required to enter intelligently upon the various branches of engineering belonging to this profession.

The special technical studies, which are offered in this course, may be grouped under the heads of Surveying, Applied Mechanics, Road and Railroad Engineering, Hydraulic Engineering, Bridge Engineering, and Sanitary Engineering.

Instruction. The work in Surveying extends over three years. It embraces land surveying, leveling and United States public land surveys during the Sophomore year; topography, railroad reconnaissance and location during the Junior year; triangulation and geodesy during the Senior year. Much time is devoted to practice in the field and drafting room, this work being

carried on parallel with the class room work. Each year a party of engineering students go into camp one week for practice in surveying and locating railway lines.

1. *Descriptive Geometry*. 2
Recitation and practice, first term. Text-book: Church's *Descriptive Geometry*.
2. *Surveying* 3
First, and part of second, term. Care, use, and adjustment of instruments; use of chain, tape, compass, transit, solar attachment, level, sextant, and plane table; land surveying, leveling, contouring, laws and instructions relating to surveys of the public domain. Text-book: Raymond's.
3. *Field Practice* 2
Exercises in land, city, and topographical surveying.
4. *Highways* 1
One hour per week, second term. The location, construction, and maintenance of common, Macadam, and Telford roads; brick, stone, wood, and asphalt pavements for city streets. Text-book; Spalding's *Roads, Streets and Pavements*.
5. *Railroad Engineering* 2
Two hours per week throughout the year. Preliminary surveys and location; transition curves, yards and turn-outs; estimates of earthwork and material used in construction; the economies of railway location and management. Text-books: Searle's *Field Engineering*, and Crandall's *Transition Curve and Earthwork Computations*, first term, Wellington's *Economic Theory of Railway Location*, second term.

6. *Field Practice*2
Location of curves, turnouts, and Y's; measurement of embankments and cuts, and computation of volumes.
7. *Railroad Survey.*
One week, twelve hours per day. Actual field practice in reconnoissance, preliminary survey, and location.
8. *Drawing*2
Lettering titles for maps and drawings. Pen and colored topography.
8. (a) *Drawing*2
Lectures and practice two afternoons a week throughout the year. Shades, shadows, and perspective. Topographical and railroad maps from actual surveys.
9. *Masonry Construction*2
Two hours per week, first term. Use of lime and hydraulic cement mortars, stone and brick masonry foundations, foundations in soft materials on land and under water; cofferdams, cribs and caissons. Text-book: Baker's Masonry Construction.
10. *Roofs and Bridges*3
Four hours per week, first term; three hours, second term. Theory of computation of stresses by both analytical and graphic methods. Full computations, designs, and bills of material for a roof truss and railroad bridge. Text-books: Merriman and Jacoby's Roofs and Bridges, Parts I and II.
11. *Sanitary Engineering*2
Two hours per week, first term. Calculation and special details of construction of sewers, separate and combined systems of sewerage, purification of sewerage; municipal and domestic sanitation. Text-book: Baumeister's Cleaning and Sewerage of Cities.

12. *Technical Drawing*2
Lectures and practice, four hours per week throughout the year. Right and oblique arches; masonry dams; structural details and working drawings for designs.
13. *Waterworks Engineering*2
Two hours per week, second term. Study of systems of water supply; collection, purification and distribution of water; location of waterworks, with details of estimate of cost. Text-book: Fanning's Hydraulic and Water Supply Engineering.
14. *Engineering Laboratory*2
Two hours per week, first term. Test of strength and other properties of materials of construction; tensile and crushing tests of brick, stone, and cement; flow of water through pipes, elbows, valves, and measurement by means of weirs.
15. *Field Practice*2
Two hours per week, first and second term. Topographical survey, triangulation, and leveling.

ELECTRICAL ENGINEERING.

H. N. GLADSON, Professor.

W. A. TREADWAY, Adjunct Professor.

Two courses of instruction are offered. The four years' course is intended to afford a good general education, and at the same time to ground the student so thoroughly in the principles of Electrical Engineering as to furnish a good foundation for the profession.

Theoretical and applied electricity and the mechanics of engineering are naturally the leading subjects.

Theory is amply treated and tested by experiments in well equipped laboratories, thus affording the stu-

*Electives can only be taken on approval of the Professor.

dent a degree of facility in the use of instruments and machines, which is acquired only by continued practice. As a requisite for graduation, each candidate must present an acceptable thesis, embodying the results of special study. The subject of such study must lie within the field of Electrical Engineering. It must be announced not later than the beginning of the second term of the Senior year, and be approved by the Professor in charge. The completed thesis must be submitted not later than two weeks before commencement day, and one copy must be deposited in the Library as the property of the University.

The short course, of two years, is designed for students lacking time and preparation for the full course, and is intended especially for those students who have had some practical experience in engineering. The work is more elementary than in the long course, embracing only the necessary mathematics, which, with physics, electrical engineering and laboratory work, gives the student sufficient theory, supplemented by practice in the shortest possible time.

This course prepares students for practical work, such as superintending or managing lighting, power, or manufacturing plants. It does not lead to a degree, but a suitable certificate will be given on completion of the work.

1. *Electrical Engineering*5

Recitations, lectures and practice five times a week throughout the year. Installation and operation of electrical machinery; Underwriters rules; calculations; estimates; specifications and practical work. Text-book: Management of Dynamos and Motors, by Croker & Wheeler.

Professor Gladson

Adjunct Professor Treadway.

2. *Electrical Measurements*2

Recitations and practice twice a week, second term. Text-book: Electrical Measurements by Carhart and Patterson.

Professor Gladson.

3. *Technical Drawing*2

Lectures and practice two afternoons a week throughout the year. Working drawings of electrical apparatus; wiring plans designed by student.

Adjunct Professor Treadway.

4. *Technical Drawing*2

Lectures and practice six hours a week throughout the year; an extension of Course 3, and must be preceded by it. Drawings of circuit and machine, electrical calculations, and mechanical designs of electrical machinery; complete power plants designed by student.

Professor Gladson.

5. *Electrical Laboratory*2

One afternoon a week throughout the year. An extended course in magnetic and electrical measurements; current, electro-motive force, and resistance; use and calibration of instruments, voltmeters, and potentiometers; exploration of magnetic fields; dynamo work begun.

Adjunct Professor Treadway.

6. *Electrical Laboratory*4
 Two afternoons a week throughout the year. This is an extension of Course 5, and must be preceded by it. A full experimental course in operating and testing direct and alternate current machines; Photometry transmission, storage, and transformation of electric energy. Special courses given suited to the preparation and object of the student.
Professor Gladson.
7. *Dynamo and Electrical Machinery*3
 Recitations. Three hours a week throughout the year. Confined chiefly to direct current apparatus, including types of motors, generators, and transformers; design, calculations, construction, testing, and operating. Text-book: Thompson's Dynamo Electric Machinery.
Professor Gladson.
8. *Theory of Alternate Currents*2
 Recitations three times a week, first term. Text book: Steinmetz
Professor Gladson.
9. *Polyphase Electric Currents*2
 Recitations and lectures three times a week, second term. Text-book: Thompson.
Professor Gladson.
10. *Electric Railways*2
 Recitations and lectures twice a week, second term.
Professor Gladson.
11. *Telephony and Telegraphy*2
 Lectures and recitations twice a week throughout the year. Text-book: Preece's Telephone.
Professor Gladson.

12. *Electrical Machinery* 3

Recitations three times a week on Direct and Alternate Current Dynamos and Motors; their application to light, power, railway, mining and manufacturing. Text-book: *Dynamo Electric Machinery* by S. Sheldon.

Adjunct Professor Treadway.

COURSE IN ELECTRICAL ENGINEERING FOR THE DEGREE

B. E. E.

	Hours per week.
FRESHMAN YEAR.	
Mathematics 1, 2 (Solid Geometry, Trigonometry, Algebra)	5
English 1 (English Grammar, American Literature)	3
Physics 1 (General Physics)	3
M. E. 2 (Mechanical Drawing)	2
*M. E. 1 d, b (Shop Work)	3

SOPHOMORE YEAR.

Mathematics 4, 5 (Determinants, Analytic Geometry and Spherical Trigonometry, Calculus)	5
Chemistry 1 (General Inorganic Chemistry)	3
C. E. 1 (Descriptive Geometry) or (Architectural Drawing), first term, and E. E. 2 (Electrical Measurements), second term	2
*M. E. 1 c, e (Shop Work)	3

One of the following three-hour courses:

Physics 2, Electricity and Magnetism. English 2, Rhetoric and English Literature. German 1, Elementary Course. French 1, Elementary Course. Spanish 1, Elementary Course	3
--	---

JUNIOR YEAR.

Mathematics 6 (Calculus)	3
E. E. 7 (Dynamo Electric Machinery)	3
E. E. 5 (Electrical Laboratory)	2
E. E. 3 (Technical Drawing)	2

* Students who have credit for M. E. 1 d, e, d in the Preparatory School will be required to take M. E. 1 e three hours a week for one year only.

M. E. 4 (Mechanics and Hydraulics)	4
M. E. 5 (Steam Machinery), second term, and Chemistry 14 (Electro-Chemistry), first term	3

SENIOR YEAR.

E. E. 8 (Alternate Current Theory), and E. E. 9 (Poly- phase Electric Currents)	3
E. E. 6 (Electrical Laboratory)	4
E. E. 4 (Technical Drawing)	2
E. E. 11 (Telephony and Telegraphy)	2
E. E. 10 (Electric Railways)	2
M. E. 6 (Mechanical Laboratory)	2
Thesis	

SHORT COURSE IN ELECTRICAL ENGINEERING.

	Hours per week.
FIRST YEAR.	
E. E. 1 (Electrical Engineering)	5
E. E. 3 (Technical Drawing)	2
Physics 1 (General Physics)	3
M. E. 4a (Elementary Mechanics)	3
*M. E. 1 d, b (Shop Work)	3

SECOND YEAR.

E. E. 12 (Electrical Machinery)	3
E. E. 4 (Technical Drawing)	2
E. E. 11 (Telephony and Telegraphy)	2
E. E. 5 (Electrical Laboratory)	2
M. E. 5 (Steam Machinery) and M. E. 6 (Mechanical Laboratory), or E. E. 6 (Electrical Laboratory)	3
*M. E. 1 c, e (Shop Work)	3

*Students who have credit for M. E. 1 b, c, d, in the Preparatory School will be required to take M. E. 1 e, three hours a week for one year only.

†Candidates for admission to this course will be required to pass the examinations for admission to the Freshman Class in English and Mathematics only.

AGRICULTURE AND HORTICULTURE.

Upon the satisfactory completion of the regular course in Agriculture the degree of Bachelor of Scientific Agriculture, or Bachelor of Science is conferred. The course in Horticulture also leads to the degree of Bachelor of Science. A two years' course is provided in each department for those students who cannot remain to complete the regular course.

The full course in Agriculture and Horticulture is intended to afford a training as broad as any other course of study, and equal in educational value. Practical Agriculture is an art, but in this field as well as in Horticulture, the art is based upon principles derived from a number of sciences.

The course of instruction, therefore, aims throughout to give the student a grasp of these fundamental principles and at the same time furnish opportunity for observing their practical application to the extent of rendering him in large measure independent of mere arbitrary rules of practice. The student is encouraged to discover, plan, and execute for himself, and he is materially aided in such efforts by the knowledge, both theoretical and practical, derived from his daily association with specialists in the lines which he is pursuing.

In so far as possible practice in the more important operations and methods is required of students as a supplement to class-room instruction. Each student is expected to acquire a degree of practical skill,

to learn the use and care of implements and machinery, and a knowledge of the best methods.

Some of the subjects included in the courses are of value to students in other departments as part of a liberal education.

AGRICULTURE.

C. L. NEWMAN, Professor.

1. *Introduction.*

Definition of scope of subject, relation to science, history, etc.

(a) *Soils.*

Origin, classification, properties, relation to climate and crops, drainage; irrigation, hygiene and general management of soils; special management for special purposes.

(b) *Farm Crops.*

Farm manures and germ manuring, preparation and culture, food plants, forage and hay plants, root crops, pastures; textile, oil and sugar plants; harvesting.

2. (a) *Farm Buildings, Machinery and Tools.*

Construction and management of stables, barns, dairies, silos, piggeries, sheepfolds, poultry houses, farm fences and roads. Management and utility of farm machinery and tools.

(b) *Zootechny.*

Breeds and breeding of horses, cattle, sheep, swine, goats, poultry, etc., and their specific and general management; aviculture, pisciculture; insecticides.

3. *Rural Economy.*

Farm rules and management; hired labor; farm accounts; markets and marketing; meteorology.

HORTICULTURE.

ERNEST WALKER, Professor.

1. *(a) Physiology of Plants.*

A study of the subject from the horticultural standpoint.

(b) The Principles of Plant Breeding.

Environment, variation, heredity, cross-pollination, selection, improved varieties, evolution of fruits and vegetables.

2. *(a) Horticultural Structures and Conveniences.*

Hotheds, cold frames, pits, greenhouses, materials, construction, greenhouse heating, ventilation, management, implements.

(b) Propagation of Plants.

The various methods by which plants are multiplied; spores, seed, cuttings, budding, grafting; transplanting.

(c) Vegetable Gardening.

Studies in the growing and forcing of the principal vegetables adapted to the State, for home use and market; with special attention to methods of marketing.

3. *(a) Fruit Culture.*

Orcharding, viticulture, small fruits, with reference to kinds and varieties best adapted to the State, cultivation, marketing, etc.

(b) Vegetable Pathology.

The commoner plant diseases and insect pests of trees and garden plants; spraying and other methods of control.

(c) Decorative Gardening.

Lawns, flowers, shrubs, trees adapted to the improvement of the home grounds, school grounds and park. Selection, propagation, arrangement, care.

(d) Forestry.

A study of the forest trees of the State, and forestry matters from an economic standpoint.

MILITARY SCIENCE AND TACTICS.

CAPTAIN GEORGE K. SPENCER, U. S. Army.

1. *Practical Work*3
Three hours per week. In school of the soldier, squad, platoon, company, and battalion, close and extended order; ceremonies of grand mounting, dress parade, inspection and review; camping, guard duty, target practice, laying out field works, and signaling. In this work the cadet officers act as instructors, thus putting into practice the knowledge gained in previous years.
2. *Recitations and Lectures*1
One hour per week. Infantry Drill Regulation (U. S. Army, Part 1). Manual Guard Duty (U. S. Army).
3. *Recitations and Lectures*1
One hour per week. Infantry Drill Regulation (U. S. Army, Part 2). Small Arms Firing Regulations (Blunt).
4. *Recitations and Lectures*1
One hour per week. Military Field Engineering (Beach). Military Signaling (United States Army Signal Code).
5. *Recitations and Lectures*1
One hour per week. Service of Security and Information (Wagner). Military Law (Winthrop).

MUSIC.

PIANOFORTE DEPARTMENT.

*MR. AND MRS. E. L. BUSCH.

MISS ANNA H. EDMISTON.

Grade I.

Clavierschule, H. Wohlfahrt Bellaks Method; Koehler Op., 204; Loeschhorn Op., 186. Gurlitt Op., 178; Reinecke

*Mr. and Mrs. Busch resigned January 1, 1901.

Favorite Melodies, including finger exercises and Scales, Arpeggios, etc.

Grade II.

Clementi Op., 36; Kuhlau Op., 55; Doring Etudes; Le-moine Op., 37; Lichner Pieces; Gurlitt Album Leaves; Jada-ssohn Spring Flowers; Kullack Scenes from Childhood; Spindler Op., 93; Little Dances.

Grade III.

Duvernoy Op., 120; Doring Op., 8; Behrens Op., 79; Ber-tini Op., 100; Loeschhorn Op., 65; Bach Little Preludes, Easy Sonatas by Haydn, Mozart and Beethoven, Schumann Album Op., 68; Reinecke Op., 154, Gade Op., 36, Jensen Op., 33, Low Arranged Operatic Melodies.

Grade IV.

Behrens Op., 61, Books 3 and 4; Alois Schmitt Op., 16; Czerny Op., 299, Krause Op., 9; Bach Preludes, Beethoven, Haydn, Mozart Sonatas, Gade Op., 18, Mendelssohn Songs Without Words; Grieg Op., 3, Op., 17, Jensen Wanderbilder Kirchner Album Leaves, Modern and Popular Music.

Grade V.

Cramer Studies, Czerny, Op., 740, Bach Well Tempered Clavichord, Steinelt 78, Weber Rondo in Eb., Sonatas by Hummel, Scarlatti, Beethoven, Schumann Op., 32, Schubert Op., 94; Schumann, Chopin, Heller, Henselt, etc.

Grade VI.

Clementi Studies, Moscheles Op., 70, Beethoven, Liszt, Thalberg, Scharwenka, Tausig, Rubinstein, Moszkowski, Tschaikowsky, Concertos, Ensemble Music, etc.

Pupils are not confined to any particular years or terms in passing from a lower to a higher grade.

*VIOLIN AND ORCHESTRAL DEPARTMENT.

E. L. BUSCH, Director.

Grade I.

Mazas Method; Schradieks Technical Exercises; Easy pieces, Scales and Arpeggios in the first position.

Grade II.

Mazas Method; Schradieks Exercises; Scales and Arpeggios in more difficult keys and introduction of the third position. Pieces and Studies within the first and third positions.

Grade III.

Mazas Etudes Op. 36; Dancala Compositions; Scales and Arpeggios introducing the fifth and seventh positions. Classic and Popular Music within these positions.

Grade IV.

Kreutzer Studies; Scales and Arpeggios through all positions. Sonatas, Haydn, Mozart, Beethoven. Viotti Duets; Classical and Popular Music.

Grade V.

Fiorillo and Rode Studies; Spohrs Duets. Concertos by Viotti Rode, Kreutzer and Spohr. Brilliant Duos with Piano, etc.

Grade VI.

Solo and Ensemble Music by the best Classic and Popular Composers. Modern Concertos and finishing department.

Harmony, Counterpoint and Composition taught according to Richter, Jadassohn, Osear Paul and other authorities.

Pupils advanced from a lower to a higher grade without loss of time, and are not confined to any particular term or year.

*Offered during first term of 1900, 1901.

VOICE CULTURE AND VOCAL MUSIC.

MISS GERTRUDE CRAWFORD.

True cultivation of the voice consists in the development of pure tone, and its easy, natural use and control in singing.

Attention is given to respiration as an art applicable to singing; position of mouth and tongue, and control of the face in singing; emission of voice on vowels; exercises for uniting the registers; practice on sustained tones in the entire range of the voice; exercises in agility and velocity; exercises in articulation of consonants and vowels; study of delivery and expression; the formation of good style, etc.

Garcia's Vocal Exercises, Conecane, Bordogni, Marchesi, Panzeron, and other technical works; songs of the English, Italian, French and German Schools; church music; study of opera and oratorio.

TERMS.

18 weeks, two lessons per week, Pianoforte and Voice

Culture, each	\$22.50
Harmony in class	5.00
Use of pianoforte for practice, one hour daily	2.50

Tuition payable in advance.

No deduction will be made except in case of prolonged illness.

Instruction in Guitar and Mandolin playing given.

ART DEPARTMENT.

*MRS. JENNY DELONY RICE, Director.

Student of the "Beaux Arts for Women" and "Julien" Ateliers, Paris.)

MISS C. S. BREDIN, Director.

Branches Taught.

Charcoal, crayon, pencil, pen and ink drawing, oil, water color and pastel, painting.

Special classes in industrial designing and illustrating, ornamental and decorative work.

The Art Club for study and quick sketching meets once a week, when lectures are delivered on Art History.

The full course covers four years, but students will be advanced individually, and no hindrance will be imposed upon those who can complete the course in less time.

COURSE OF STUDY.

First Year.

ELEMENTARY DRAWING—Light and Shade.

1. Construction of lines.
2. Drawing in outline from geometric solids.
3. Drawing in outline from casts.
4. Drawing in outline from still life.
5. Study in light and shade.
6. Perspective, theory and applied.

Second Year.

DRAWING AND PAINTING.

1. Still life groups from objects.
2. Landscapes from studies and nature.
3. Fruit, flowers and foliage from nature.
4. Perspective, lights and shadows.
5. Designs for wallpaper, carpets, etc.
6. Historic ornament, decoration.

*Absent on leave.

*Third Year.***PAINTING IN OIL, WATER COLORS AND PASTEL.**

1. Heads from the cast, shaded.
2. Figures from the antique, shaded.
3. Still life studies in oil, water color or pastel.
4. Fruits and flowers from nature.
5. Landscape from nature and studies.
6. Original composition and design.

*Fourth Year.***PORTRAITURE FROM LIFE, FIGURE AND LANDSCAPE PAINTING—****BOOK ILLUSTRATION.**

1. Portraits from life.
2. Animals, landscape, marine.
3. Interior decoration.
4. Composition, genre subjects.
5. Illustration of books, magazines, etc.
6. Practical and applied design.

TERMS.

1. Terms to be arranged with the Director of the Department.

Pupils will consult Mrs. Rice with regard to the Department and materials needed.

ELOCUTION, ORATORY.

1. It is the aim of this department to give such a course of instruction and training as will lead to ease, naturalness and correctness in the expression of thought. To accomplish this, the special endowments of each student are to be carefully regarded.

2. The term "Expression" as now used comprehends the following subdivisions:

(a) *Elocution, or Expression by Means of the Voice.*

(b) *Oratory and Public Speaking.*

(c) *Reading.*

(d) *Pantomime or Gesture—Expression by Means of Body.*

(e) *General Culture.*

Training in the following courses will be given:

The Teacher's Course.

Training for thorough understanding and mastery of vocal principles as applied to speaking (and reading).

Technical training for bodily responsiveness (gesture).

Special work for developing harmony between mind, body, and voice. (The ultimate aim, Poise of Being.)

Careful investigation of natural principles underlying true development of ease in expression.

Application of advanced methods in education in teaching expression.

Study of literature as related to expression.

The Public Reader's Course.

Training to develop plasticity of voice.

Study of the principles of Nature and Art in their relation to expression as an aid in awakening artistic instinct.

Study of literature in relation to expression.

Characterization and dramatic work.

The relation of the speaker to the audience.

Oratory or Public Speaking.

Training the mind to keener appreciation of higher truths in all the relations of life.

Systematic and individual training of voice and body to develop ease and naturalness, and to stimulate universal sympathy.

Training for proper action of mind in speaking. Development of ease in speaking before an audience.

Work for ease in extemporaneous speaking.

Work to develop quickness and accuracy in debate.

All training in accord with nature's intention and to overcome mechanical expression.

General Culture Course.

Training for ease and grace of bearing.

Correctness and pleasantness in use of the voice.

Development of taste and artistic instinct.

Technical training for each course is arranged by steps to be mastered in order.

The mastery of each course comprehends the work of three years, beginning with students advanced to the degree in regular University course.

Three certificates of proficiency are awarded:

General Culture.

Teachers.

Public Speakers.

The student completing the full course receives an artistic diploma.

PHYSICAL CULTURE.

It is a well known principle among educators that correct training is based upon co ordinate development of body and mind.

The work in this department is to develop and strengthen the pupils normally.

Systematic and careful training is given according to individual needs. The course is adapted from

Educational—German, Swedish, American.

Aesthetic—Delsarte.

The gymnasium is furnished with modern apparatus.

TEACHERS' NONRESIDENT COURSES.

The University offers special opportunities to all teachers in Arkansas. It will admit them to its regular examinations for admission to the Freshman class, or will send the examination questions to county examiners, who will submit them to teachers under the usual rules and return answers to the University. Teachers who pass the required entrance examinations may then matriculate and enter upon nonresident courses of study under the direction of the University Professors; and upon completion of one term's work in any branch, they will be examined upon said work and credited with it, if it comes up to the University standard.

After finishing three-fourths of the course for a bachelor's degree, such teacher-students may graduate by completing the course as regular resident students.

Nonresident study is pursued under disadvantages, and none but energetic and methodical persons, who are willing to practice much self-denial, can succeed in such work. Such courses of study are in many respects less thorough than study under regular instruction at the University. Yet thousands of persons who cannot attend college regularly are thus educating themselves; and the self-reliant habits of study and investigation acquired by successful work of this kind are of untold value.

Teachers accepting this offer must obtain not less than two credits (two subjects passed for one term, or one subject for two terms), each year; else their names will be dropped from the rolls. Teachers whose vacation occurs during the session of the University may supplement their nonresident study by attending the regular classes.

COURSE IN MUSIC, ART AND ORATORY.

The following course has been provided for such students as do not desire to pursue a regular course leading to a degree, but who wish to prosecute the study of Music, Art or Elocution, together with certain studies in Language and History.

	Hours. per week
FIRST YEAR.	
Music, Art or Oratory	6
English 1	3
History 1 and 4	3
Ancient or Modern Language	3
SECOND YEAR.	
Music, Art or Oratory	6
English 2	3
History 2	3
Ancient or Modern Language	3
THIRD YEAR	
Music, Art or Oratory	6
English 3 or 4 and 7	3
History 3 and 5	3
Elocution	3

1. As a prerequisite for admission to the above course the student must complete all the work in one of the courses in the Preparatory Department or its equivalent, as attested by an examination or diploma from an accredited school.

2. A certificate will be awarded each student who completes the course, but this certificate shall not confer on the owner any of the privileges of alumni or alumnae of the University.

Should a student pursuing this course desire to change to a regular course leading to a degree, credit will be given for the studies completed in the above course, except Music, Art and Oratory.

PREPARATORY SCHOOL.

INSTRUCTORS.

W. A. CRAWFORD, Principal (absent on leave), Mathematics.

G. A. COLE, Principal, Mathematics and Book-keeping.

MRS. E. W. COLE, History, Physiology and Latin.

NAOMI J. WILLIAMS, Latin and History.

JOELLE HOLCOMB, Latin and Mathematics.

LINA REED, English and Latin.

MARY A. DAVIS, English and History.

SUSIE H. SPENCER, Mathematics and Geography.

ROZE E. BENNETT, Mathematics and History.

B. N. WILSON, Woodwork and Foundry.

MACK MARTIN, Machinist Work and Forging.

MISS C. E. BREDEN, Drawing.

MISS JENNY BOWMAN, Elocution and Physical Culture.

GERTRUDE S. CRAWFORD, Vocal Music.

ANNA EDMISTON, Instrumental Music.

The collegiate teachers of the University assist in the Preparatory School whenever needed and it is practicable for them to do so. During the past year the following officers have rendered assistance: P. H.

Walker, Physics; S. J. McLean, Civil Government; Junius Jordan, Elementary Pedagogy and School Management.

The Preparatory School is intended, first, to prepare students for any of the courses of study taught in the University; second, to furnish to those who cannot take a more extended course, as good a general education as the limited time will permit; third, to prepare teachers for the public grammar schools of the State. To secure these ends, four courses of study are offered, viz: Arts (A), Engineering (E), Science (S), and Teaching (T).

The course in Pedagogy, School Management and Methods has been arranged for students of mature age who cannot take a full course at the University, and who wish to qualify themselves for the work of teaching in the common schools. It is supplemented by practical lectures, illustrative work in primary classes, and a thorough investigation and discussion of all the methods involved in the ungraded schools.

REQUIREMENTS FOR ADMISSION.

1. *Arithmetic.* Students are examined in the whole of the Grammar School Arithmetic, and an accu-

NOTE.—Candidates for second year, general course, will be examined in Arithmetic, Algebra to fractional equations, Maxwell's Advanced Grammar, History of the United States, Descriptive Geography, Latin (Collar and Daniell), and two books of Plane Geometry.

Scientific and Engineering students are not examined in Latin, but in Physical Geography and in Bookkeeping instead. Students entering after the session has begun will be examined also in the work passed over by their classes.

Students who hold first grade teacher's certificates and who have had experience in teaching will be admitted to the second year class without examination. Other grades of certificates will be recognized to a certain extent in classifying students.

rate knowledge of all this is rigidly required. Teachers preparing pupils for admission should require them to learn principles and definitions accurately, and to analyze every example capable of analysis, and should give them thorough drill in mental arithmetic.

2. *English Grammar.* Maxwell's *Elementary Grammar*.

3. *Geography.* The whole of some complete manual of *Geography*.

4. *Reading, Spelling and Writing.* Proficiency in these subjects is tested by the examination in *Grammar*.

ORDER OF EXAMINATIONS FOR ADMISSION.

Wednesday, September 19.—9 a. m., registration of students; 1-4 p. m., *Algebra and Physiology*.

Thursday, September 20.—9-12 m., *Arithmetic*; 1-4 p. m., *Geography*.

Friday, September 21.—9-11 a. m., *English Grammar*; 11-12 m., *English Composition*; 1-4 p. m., *United States History, General History*.

DETAILED WORK OF COURSES.

FIRST YEAR.

Mathematics, 5.—Milne's *Standard Arithmetic*, reviewed; Milne's *Academic Algebra to Fractional Equations*; Beman and Smith's *Plane Geometry*, two books.

English, 4.—Maxwell's *Advanced Grammar*; Lamb's *Tales from Shakespeare*; four original essays per term, corrected and copied; Guerber's *Myths of Greece and Rome*.

Parallel Reading.—Longfellow, *Courtship of Miles Standish*; Cooper, *Last of the Mohicans*; O'Hara, *Bivouac of the Dead*; Whittier, *Snow Bound*; Hawthorne, *House of Seven Gables*; C. D. Warner, *My Summer in a Garden*; Irving,

Sketch Book; Cooke, Surrey of Eagle's Nest; Selections from Pike; Washington's Rules of Conduct; lives of the above authors.

Latin, 4.—Collar and Daniell's **First Latin Book**.

History, 3.—Shinn's United States History and Shinn's **History of Arkansas**.

Geography, 3.—Redway and Hinman's **Natural Advanced Geography**.

Bookkeeping, 1.—Messervey's **Bookkeeping**.

Woodworking, 4.—Principles of carpentry and joinery; wood turning; pattern making, cabinet work. Sickel's **Exercises in Woodworking**.

Freehand Drawing, 2.—Practice work, outline drawing from models and machine parts; plans, elevations, sections, dimensions, etc.

SECOND YEAR.

Mathematics, 5.—Milne's **Academic Algebra** completed; Beman and Smith's **Plane Geometry**, completed.

English, 4.—Raub's **Rhetoric**; five essays per term, corrected and copied; Burke, **Conciliation with America**; Carlyle, **Essay on Burns**; Shakespeare, **Julius Caesar**; Milton, **L'Allegro, Il Peuserosa, Comus, and Lycidas**.

Parallel Reading—George Eliot, **Silas Marner**; Scott, **Ivanhoe**; Shakespeare, **Merchant of Venice**; Dryden, **Palamon and Arcite**; Pope, **Homer's Iliad, Books I, VI, XXII, and XXIV**; Coleridge, **The Rime of the Ancient Mariner**; Tennyson, **The Princess**; Addison, **De Coverley Papers**; Goldsmith, **Vicar of Wakefield**; lives of the above authors.

Latin, 4.—Four books of Caesar, or an equivalent; Bennett's **Grammar and Exercise Book**.

History, 3.—Barnes's **General History**.

Physiology, 2.—Martin's **Human Body**.

Physics, 2.—Text to be selected; lectures and written work.

Pedagogy, 3.—Roark's **Pedagogy**, Gow's **Morals and Manners**, Life of Pestalozzi, **School Interests and Duties**, by King, **Arkansas School Law**.

Civil Government, 2.—McLeary's Civil Government, Arkansas and The Nation, and Johnson's History of American Politics.

Nature Study, 2.—This course consists of studies in general elementary natural science, or the science in the common things around us. It is intended to stimulate an interest in nature; to cultivate the power and habit of observation, and to help the student to correlate and correctly interpret what he sees.

Founding, 2.—Molding; melting and pouring brass and iron; management of cupola. Ballard's Iron Founding; lectures and practice.

Forging, 2.—Management of fire, drawing; welding; riveting; tempering. Lectures and practice.

NOTE.—In the above courses the figure after each subject indicates the number of hours per week.

SUBJECTS AND COURSES.

FIRST YEAR.

Subjects.	Hours per week.	Courses Required.			
Arithmetic.....	1½	A	E	S	T
Algebra	2	A	E	S	T
Geometry	1½	A	E	S	T
Grammar	1	A	E	S	T
U. S. History.....	3	A	E	S	T
Latin	4	A			T
Geography	3			S	T
Bookkeeping	1		E	S	T
Drawing	1		E		
Shop	2		E		

SECOND YEAR.

Subjects.	Hours per week.	Courses Required.			
Algebra	3	A	E	S	T
Geometry	2	A	E	S	T

NOTE. In this table A, Arts; E, Engineering; S, Scientific; T, Teachers.

Special courses of study are not allowed in the Preparatory School, but students known to be in poor health or having physical defects which interfere with their studies, are sometimes permitted by the Faculty to defer one or more subjects of study and extend the course over a longer period.

The completion of the thirty-four hours work in one of the prescribed courses in the Preparatory School is required as a condition of promotion to the Collegiate Department. The classification, however, is governed by the rule stated under "Classification of students," page 36. Studies in lower classes have precedence of higher ones. Students cannot, therefore, omit studies in the Preparatory Department and take up collegiate studies except in such cases as may be allowed by the Faculty under paragraph 3, page 36.

TWENTY-THIRD ANNUAL ANNOUNCEMENT
OF THE
UNIVERSITY OF ARKANSAS MEDICAL COLLEGE.

The Regular Winter Course of lectures will begin on Thursday, October 10, 1901, and continue six months

Lectures will be delivered daily during the six days of each week.

The matriculation book will be opened from and after September 1st to students desiring to matriculate early and secure choice of seats.

In making this annual announcement the Faculty feel great satisfaction in referring to the continued success and prosperity of the Medical Department. The cordial indorsement of the Arkansas Medical Society and the generous influence of the medical profession throughout the State are highly appreciated and encourage the Faculty to continue the arduous labors they have so long and zealously maintained.

FOUR YEARS' GRADED COURSE.

First Year. Anatomy, Practical Anatomy, Physiology, Chemistry, Physics, Histology, and Medical Ethics.

Second Year. Anatomy, Practical Anatomy, Physiology, Chemistry, Materia Medica, Pathology, Obstetrics.

Third Year. Materia Medica and Therapeutics, Toxicology, Obstetrics and Diseases of Children, Phys-

ical Diagnosis, Diseases of the Eye and Ear, Practice of Medicine, Surgery.

Fourth Year. Review of all branches, Practice of Medicine, Surgery, Dermatology, Gynecology, Bacteriology, Urinology, Venereal Diseases, Diseases of the Nervous System, Medical Jurisprudence.

MATRICULATION.

As required by the rules and regulations of the "Association of American Medical Colleges," students on matriculating are required to present credentials showing that they are matriculates or graduates of recognized colleges of literature, science or arts, of high schools, academies, normal schools, or equivalent schools, or that they have teachers' certificates.

Graduates and matriculates in Medicine, Dentistry or Pharmacy, on presenting credentials showing such, are exempt from the entrance examination.

To avoid delay, students entitled to matriculate *without* examination are requested to bring their certificates with them and present them on arrival at the college.

Students not entitled to exemption, as hereinbefore provided, are required to pass an entrance examination, with the following requirements: the writing of an English composition of not less than 200 words; the translation of easy Latin prose; a knowledge of the elements of Arithmetic or Algebra, and of Elementary Physics.

LOCATION.

The City of Little Rock is conveniently situated in the center of the State, and railroads enter from every direction, making it easily accessible.

It has a population of more than 40,000, and has always been classed as one of the most healthful cities west of the Mississippi River. Few places can boast of better public schools, colleges and universities than Little Rock. All the eleemosynary institutions of the State are located here. These are the School for the Blind, Deaf Mute Institute, and the Insane Asylum.

MEDICAL SCHOOL BUILDING.

The new structure is an imposing edifice, three stories in height, constructed of brick and admirably arranged for the convenience of both students and instructors.

It has a large lecture hall, a fine amphitheater with chairs, a library, a reading room, a museum, several dissecting rooms, all well lighted and ventilated. In fact, it is designed to be a modern and model medical college building. It is situated on Second and Sherman streets.

HOSPITALS.

The Logan H. Roots Memorial Hospital.—By the munificence of the late Colonel Logan H. Roots and the benevolence of his widow, the City of Little Rock is to have an elegant public hospital.

The commodious building is now completed.

The Medical Department of the University is fortunate in having this hospital situated on lots adjoining their own building, thus promising greatly increased clinical facilities.

The St. Vincent's Infirmary—formerly called Little Rock Infirmary—designed solely for the treatment of acute diseases, has a capacity of nearly a hundred beds. This hospital is splendidly equipped and furnished with modern conveniences and improvements, is in the very best sanitary condition, and under the supervision and management of trained nurses, Sisters of Charity.

This magnificent institution just completed, conveniently situated, is the finest and best equipped institution of the kind in the Southwest. The hospital is much enlarged and up to date in every respect.

The Pulaski County Hospital, erected at a cost of some \$30,000, is a handsome brick structure, well arranged, complete in all its equipments, and has a capacity of 200 beds.

Accidents from railways, marine patients, and the sick and injured from the city, county and State, find in these hospitals shelter, food, raiment, and that Christian attention so cheering and comforting in sickness and distress.

The inmates of these different institutions embrace all classes and conditions of people—white, colored, male, female, adults and children—and with them are found almost every form of malady except quarantinable diseases, which are otherwise provided for.

"THE ISAAC FOLSOM CLINIC."

This clinic is thus designated in honor of the late Dr. Folsom, and in consideration of his liberal endowment of \$20,000.

The daily instruction in this clinic is thoroughly practical, and is attended by a large number of outdoor patients from the city and surrounding country. It embraces a wide range of diseases and injuries. More than 6,000 patients attended this clinic last year.

METHODS OF TEACHING.

Instruction will be given by didactic and clinical lectures, practical work in the dissecting room, chemical and physiological laboratories, and by daily quizzes upon the subject of preceding lectures.

When the subject will admit of it, each branch will be so illustrated by means of diagrams, charts, models and instruments, as to address the understanding of the student through the medium of sight as well as hearing.

EXPENSES OF LIVING, ETC.

The expenses of living in the City of Little Rock will, of course, vary according to the views and habits of students. Good board, at the present time, including lodging, fuel and lights, may be had at a convenient distance from the College, at from \$4 to \$6 per week, and from \$13 to \$18 per month.

Students on their arrival are requested to visit the University building, corner Second and Sherman

streets, where a list of parties desiring to board medical students will be found.

Persons desiring further information are requested to address the Secretary of the Faculty.

TERMS.

The fee for a full course of lectures will be:

General Ticket	\$50.00
Matriculation Ticket (paid but once)	5.00
Demonstrator's Ticket (for each course)	5.00
Hospital Ticket (each course)	3.00
Graduation Fee	25.00

No variation is made, under any circumstances, from the established fees of the College, they having been placed originally at the very lowest figure commensurate with the interests of both student and College.

For more specific information and catalogue apply to

F. L. FRENCH, M. D.,
Secretary of Medical Faculty,
 Little Rock, Ark.

NOTE - Alumni are requested to inform the Secretary of their present post office address, and of any change of location, in order that they may have the annual catalogue forwarded to them regularly.

COURSE OF INSTRUCTION.

The Law Course embraces two years divided into four terms. Fall term will commence October 1 and close January 31. Spring term will commence February 1 and close June 1.

The design of this school is to afford such training in the fundamental principles of the law as will constitute the best preparation for the practice of the profession anywhere in the United States, and especially in the State of Arkansas. With this view the course of study, which is intended to occupy the student two years, will comprise the following subjects:

JUNIOR COURSE.

First Term. Contracts, Agency, Partnership, Commercial Paper, Evidence.

Second Term. Criminal Law, Pleading, Insurance, Domestic Relations.

SENIOR COURSE.

First Term. Private and Municipal Corporations, Constitutional Limitations, Equity, Torts.

Second Term. Real Property, Judgments, Bailments, Private and Public International Law, Fraud and Fraudulent Conveyances, Bankruptcy, Federal Practice.

LIST OF TEXT-BOOKS.

Tiedeman on Real Property. Greenleaf on Evidence. Bispham's Principles of Equity. Bishop's New Criminal Law. Anson on Contracts. Mechem on Agency. Mechem's Elements of Partnerships. Daniel on Negotiable Instruments. Cook on Stock and Stockholders. Lawson on Bailments. Hale on Torts. Freeman on Judgments. Schouler on Domestic Relations. Phillips on Pleading. Cooley on Constitutional Limitations. Wharton on Conflict of Laws. May on Insurance. Brandenburg on Bankruptcy. Federal Practice—Lectures.

MOOT COURTS.

Moot Courts begin with the last term of the Junior Year and continue throughout the course, and shall be termed the judicial department of the school, and shall embrace all the courts—Justice, Probate, Circuit and Supreme—all modeled according to the constitutional requirements of our State.

Supreme Court shall consist of three judges, a Chief Justice and two associates.

Circuit Court shall consist of one Judge, a clerk and a sheriff, to be elected by the students.

County and Probate Court shall consist of one Judge, a Sheriff and a Clerk, to be elected by the students.

Justice of the Peace Court shall consist of a member of the Senior Class, who shall be elected by the student body.

These courts shall be under the immediate supervision of the Dean, who will be assisted by the members of the Faculty in compiling statements of facts embracing principles of law pertaining to the respective branches under their instruction, for the use of said courts.

GOAR LYCEUM.

This society is composed of the students of both the Junior and Senior years, and meets regularly every Thursday night during the session. The exercises shall consist chiefly of theses and debates embracing subjects legal in their nature. The performance of these exercises is insisted upon by the Faculty, for such practice affords to the student that invaluable aid to learning, "to think whilst on his feet," besides giving him an easy manner of address in public speaking.

EXAMINATIONS.

Written examinations are held each term in the presence of a member of the Faculty, upon questions handed the student at the time, and on the merit of their papers students will be graded.

DEGREES.

The degree of Bachelor of Laws will be conferred upon all students who have passed an examination on each of the subjects embraced in the course, and have attained average standard grade of proficiency.

CLASS HONORS.

Honorable competition is the life of all enterprises; therefore we confer the following evidences of distinction: Upon the student attaining the highest average grade, shall be conferred the distinction of first honor man of his class; the one attaining the next highest, the second honor man; and the one making the next highest, the third honor man.

The Faculty authorize the selection of three orators to deliver orations at the commencement exercises, as follows: The Senior Class, one; the Junior Class, one; and the **Goar Lyceum, one.**

PROFESSIONAL ETHICS.

While endeavoring to impart legal knowledge, the fact will not be lost sight of that high moral standing is a most important requisite to a successful and honorable career, and no pains will be spared in impressing this fact upon students and inculcating a high tone of **professional ethics.**

EXPENSES.

Tuition, for single course, \$50 per session; double course, \$100 per session. Board and lodging from \$15

to \$20 per month. Text-books, where student desires to purchase same, \$30 to \$40 per course. Students are provided by the Faculty with permits to the Supreme Court Library, containing 20,000 volumes.

All communications should be addressed to

Engineer.

GENERAL STATEMENT.

The Branch Normal College is a department of the University of Arkansas, established pursuant to an act of the General Assembly of the State of Arkansas, approved April 25, 1873, and has been in operation since September 27, 1875. Its primary object is the training of teachers for efficient service in the colored public schools of the State—the law referred to having been enacted with special reference to the “convenience of the poorer classes.” For the purpose of carrying out the intent of the law, tuition is made free to all appointees, the only requirements for admission being suitable age and qualification, and appointment from one of the county judges, and the payment of the entrance fee of \$5. Other students pay, in addition to the above, \$1 per month in advance.

LOCATION, ETC.

The school property consists of a beautiful tract of twenty acres of ground, in the suburbs of Pine Bluff, Jefferson County, Ark., and a few rods from the junction of the Missouri Pacific and the St. Louis Southwestern railroads. The school building, completed in 1881, and occupied January 30, 1882, is one of the handsomest educational edifices in the State, as well as one of the best, being steam heated, electric lighted and well ventilated. It contains one large assembly room, four recitation rooms, and cloak room for males and females. The building is of brick, with slate roof and trimmings of Alabama granite.

and cost, with improvements and furniture, \$12,000. The furniture and other equipments are of the best modern style.

The dormitory, a handsome brick building of seventeen rooms, and the Mechanical Department building, are upon the same grounds.

The Normal course of study is intended to be a full equivalent to a regular college course up to and including the Sophomore year, the only difference being the substitution of Pedagogy for Greek and the higher mathematical branches. The college course adds to this the usual studies of the last two years. Fifteen classes have graduated from the institution, and the members are now occupying prominent positions in life. The number of students for the year 1900-1901 was nearly 250.

THE LIBRARY.

The library consists of over 3,500 volumes, embracing many valuable reference books, such as Appleton's Cyclopaedia, Lippincott's Gazetteer, Century Dictionary, etc. It also has a fine collection of the works of standard authors—Shakespeare, Milton, Irving, Cooper, Dickens, Longfellow, Carlyle, Tennyson. The library of the Principal, embracing many valuable text and reference books, including the Encyclopaedia Britannica, is also accessible to students. A small collection of minerals, each of which is a typical specimen, and none of which are duplicates, has been procured. During the past year a valuable supply of

apparatus has been added to the educational resources of the institution, consisting of an air pump, electrical machine, standard barometer, batteries, French microscope, X-Ray apparatus, spectroscope, sets of weights and measures, common and metric, etc. The outfit of the Mechanical Department is not surpassed, if equalled in quality, by any in the State.

The Reading Room has been fitted up in elegant style and supplied with quite a number of valuable newspapers and periodicals, many of which are furnished by their publishers. Among those on file are the *Freeman*, Indianapolis; *Western Appeal*, Minneapolis; *Gazette*, Huntsville; *The Gazette*, Little Rock; *Globe-Democrat and Republic*, St. Louis; *The Tyler*, Detroit, Mich.; *Popular Educator*, Boston; *Lippincott's Educational Quarterly*, *American Student*, New York; *Weekly Echo*, Pine Bluff; *National Baptist*, Philadelphia; *Southern Review*, Helena; *American Machinist*, *Scientific American*, *Popular Educator*, *Nation*; the scientific publications of the State of Arkansas and of the United States, etc.

GROUNDS, BUILDINGS AND EQUIPMENT.

Campus, twenty acres; college building (brick), six rooms; brick dormitory for girls, twenty rooms; shop building (brick, six rooms; ironclad storage building, one room; laundry, one room; machinery, value \$5,000; library, 3,500 volumes; physical apparatus, \$1,500; sewing machines, typewriters, equipment in art needlework department, \$500; range and

cooking outfit, \$300; musical instruments, piano, organs, violoncello, mandolin, flute, guitar, \$1,000.

DORMITORY FOR GIRLS AND BOARDING HOUSE.

The dormitory for female students is under the supervision of the Principal and his wife. It is a handsome brick structure, sufficient for the accommodation of thirty or forty students. Board bills are payable monthly in advance, and no deduction is made for loss of time less than one week. Girls staying in the dormitory are required to keep their own rooms and the halls clean, and to assist in turn in the dining room and kitchen. They are expected to furnish their own bed clothing and are held responsible for all damage to furniture in their rooms. They are not to visit each other's rooms, except by invitation from the occupant, and two are expected to occupy one room. They are not allowed to change rooms, nor to visit in town except by permission. The charge for board, fuel and light thus far has been \$8 per month, in advance, and, if possible, that price will be continued. Girls who wish to board elsewhere must obtain permission from the Principal.

DOMESTIC TRAINING, PLAIN NEEDLEWORK AND ART NEEDLEWORK.

The female students of the institution have daily training in housekeeping, plain sewing and art needlework. This department is under the superintendence of Miss Louisa M. Corbin, a graduate of Ann

Arbor, Mich. The department is equipped with a sufficient number of Wheeler & Wilson and Singer Sewing Machines and a liberal supply of all necessary accessories. Already the success of the department has been very decided, and it has had many specimens of fine work on exhibition. These students also receive daily instruction in typewriting from Professor T. G. Childress.

MECHANICAL DEPARTMENT.

The operations of this department are under the superintendence of Professor C. F. Houghton, Superintendent of Mechanic Arts at Fayetteville, assisted by Professor W. S. Harris, a graduate of the Miller Manual Labor School of Virginia, and Professor E. K. Braly, a graduate of the University of Arkansas.

The shop building was completed in February, 1892. It is of brick and covers a plot of ground 70 by 70, comprising a wood shop 35 by 35, a foundry 25 by 25, a blacksmith shop 25 by 25, and a machine shop 35 by 25; a boiler room 20 by 25, and a court 35 by 20 occupying the remaining space.

Wood Shop. Twelve benches, with complete set of tools for each, a double circular sawing machine, scroll saw, band-saw, shaper, carving machine, buzz-planer, pattern lathe, six turning lathes, and many necessary small tools make up the equipment in this department.

Forge Shop. Twelve Buffalo forges are in position, the blast being supplied by a blower, and the

smoke drawn off by a large exhaust fan. Besides the usual outfit of anvils, hammers, tongs, etc., there is a Buffalo punch shear and bar cutter capable of cutting off 1 inch bar iron, $\frac{1}{2}$ by 3-inch strap iron, or of punching a $\frac{3}{8}$ -inch hole in $\frac{3}{8}$ -inch iron.

Machine Shop. The equipment consists of a 15-inch crank shaper, a 24 by 24 by 6 foot planer, a 20-inch drill press, a 15 inch by 5 foot turret lathe, a 14 by 6 inch engine lathe, a 12 by 5 hand lathe, universal milling machine, cutter and reamer grinder, twist drill grinder, power grindstone, emery grinders, benches, vises, and all small tools necessary in machine shop work.

Heating and Power Plant. This consists of two vertical engines of 12-horsepower each, two 30-horsepower tubular boilers, and a 30 light dynamo. The piping for feed water is so arranged that the water passes from either pump or injector through a feed water heater to the boilers; and the exhaust piping is so arranged that the exhaust steam from the engines can be used either to heat the feed water or to heat the shops.

Water Supply. In the court of the shop building is a 4-inch Cook tubular well, which furnishes 1,000 gallons of water per hour, delivering it to a tank thirty feet above ground, holding 8,000 gallons.

Sanitary Provisions. The shops are thoroughly well lighted, ventilated, heated, and drained. Sewer connection is made to all buildings, and the abundant

water supply is used to insure cleanliness in wash room and water closet.

The courses in the department are as follows, viz:

(a) A course in general shop work, extending over three years, followed by a fourth year's work in one of the shops selected by the student. The design is to enable a young man to choose his trade intelligently and to acquire a sound basis for it.

(b) A three years' course in general shop work, followed by a fourth year's work in the management of boilers, engines and heating systems. This course is intended to train young men for the practical work of foremen or engineers.

(c) A course in general shop work, extending over three years, together with class room work in the theory and practice of teaching, followed by a fourth year's work in handling classes in the shops and in laying out series of practical exercises.

For fuller information respecting this and other departments, reference is made to the catalogue of Branch Normal College.

GENERAL EXERCISES.

In addition to the regular class exercises prescribed in the course of study, there are regular lessons in vocal music, which are open to all students. The general exercises also include a review of a Sabbath School lesson, review of the events of the week, calisthenics, music, and drawing. Music upon instruments — the organ, piano, flute, guitar, etc. — is extra, but

very reasonable in price. There are two literary societies, the Junior and Senior, which hold weekly meetings and afford excellent opportunities for practice in oratory, debate and composition. It is required that every student shall become a member and attend the meetings of one of the societies.

The length of the vacation allows the advanced students an opportunity to engage in teaching, and a large proportion of their number have done so during the last five years. In nearly all cases they have given satisfaction and conduct their schools with a fair degree of success. The Normal students have also assisted in the work of the institution itself as a part of their training.

It will be a great advantage to the institution if the various county judges will take a special interest in seeing that their counties are represented. The forms for appointments and apportionment of beneficiaries are the same as stated in this catalogue. The proper blanks for making the appointments will be furnished, together with all necessary information, on application to the Principal.

J. C. CORBIN, A. M.,
